

“Taking AP courses in high school helped me in **every step** that I took in college. I always found myself looking back to **what I learned in AP.**”

Plan Their Path to Success with AP

Research shows that students who take and complete Advanced Placement® (AP®) courses and exams are better positioned to succeed in future classes and in college. Now is the time for your teen to begin considering which courses they'd like to take in the next school year.

Consider these options when choosing AP courses:

AP CONNECTIONS TO MAJORS AND CAREERS

3 in 5 students said their AP experience influenced their plans to major in a particular subject. AP courses can set your teen up for success in college and career. Whether exploring a passion to determine if it's a field they want to go into, or leaning into their dreams early, students can access our resources to understand the connections between careers, majors, and AP courses.

PROJECT BASED AP COURSES

These courses take your teen beyond their textbook and into a world of exploration that will help them develop skills for their future. In these classes, students build knowledge and skills through investigation or developing portfolios.

AP COURSE PAIRS

Taking AP courses that complement each other is a good way for your teen to extend their learning. They'll deepen their knowledge and sharpen their skills through cross-curricular study.

Visit our planning hub to explore course connections and groups, along with planning resources.

These tools help guide students, whether they're planning their first or their next adventure in AP.
