

AP DIGITAL EXAMS

Conversation Guide: Technical Readiness

Ask your IT colleagues two questions to make sure your school can support digital AP® Exams.

Questions for IT	Considerations	Requirements
<p>Can our network support digital AP Exams?</p> 	<p>Wireless strength and speed: Your testing rooms need Wi-Fi coverage that supports the expected number of test takers.</p> <p>Connectivity: Students need a connection at the start and end of the test, but they can keep testing if they lose their connection or if the internet goes down momentarily.</p> <p>Guest network: Students and staff, including guests, need to connect to Wi-Fi on test day, even if they use personal devices.</p>	<ul style="list-style-type: none"> ▪ Bandwidth of at least 1 Mbps for each student testing at the same time over the same network. ▪ Permit network traffic to and from College Board. ▪ Full specs at cb.org/ap-digital-networks
<p>Can we use school-managed devices for testing?</p> 	<p>Specifications: The Bluebook™ testing app has device requirements typical of other applications used in schools.</p> <p>Device management: Students can test on 1:1 or shared school-managed devices or on personal devices. Your choice.</p> <p>Device types: Mac and Windows devices, iPads, and school-managed Chromebooks are all supported.</p>	<ul style="list-style-type: none"> ▪ Supported operating systems and other specs vary by device type. ▪ Battery life of at least 4 hours. ▪ Chromebooks must be school-managed and run in kiosk mode. ▪ External keyboards required for iPads. ▪ Full specs at cb.org/ap-digital-devices
