What AP[®] Stands For

Thousands of Advanced Placement teachers have contributed to the principles articulated here. These principles are not new; they are, rather, a reminder of how AP already works in classrooms nationwide. The following principles are designed to ensure that teachers' expertise is respected, required course content is understood, and that students are academically challenged and free to make up their own minds.

1. AP stands for clarity and transparency. Teachers and students deserve clear expectations. The Advanced Placement Program makes public its course frameworks and sample assessments. Confusion about what is permitted in the classroom disrupts teachers and students as they navigate demanding work.
2. AP is an unflinching encounter with evidence. AP courses enable students to develop as independent thinkers and to draw their own conclusions. Evidence and the scientific method are the starting place for conversations in AP courses.
3. AP opposes censorship. AP is animated by a deep respect for the intellectual freedom of teachers and students alike. If a school bans required topics from their AP courses, the AP Program removes the AP designation from that course and its inclusion in the AP Course Ledger provided to colleges and universities. For example, the concepts of evolution are at the heart of college biology, and a course that neglects such concepts does not pass muster as AP Biology.
4. AP opposes indoctrination. AP students are expected to analyze different perspectives from their own, and no points on an AP Exam are awarded for agreement with a specific viewpoint. AP students are not required to feel certain ways about themselves or the course content. AP courses instead develop students' abilities to assess the credibility of sources, draw conclusions, and make up their own minds.

As the AP English Literature course description states: "AP students are not expected or asked to subscribe to any one specific set of cultural or political values, but are expected to have the maturity to analyze perspectives different from their own and to question the meaning, purpose, or effect of such content within the literary work as a whole."

5. AP courses foster an open-minded approach to the histories and cultures of different peoples. The study of different nationalities, cultures, religions, races, and ethnicities is essential within a variety of academic disciplines. AP courses ground such studies in primary sources so that students can evaluate experiences and evidence for themselves.
6. Every AP student who engages with evidence is listened to and respected. Students are encouraged to evaluate arguments but not one another. AP classrooms respect diversity in backgrounds, experiences, and viewpoints. The perspectives and contributions of the full range of AP students are sought and considered. Respectful debate of ideas is cultivated and protected; personal attacks have no place in AP.
7. AP is a choice for parents and students. Parents and students freely choose to enroll in AP courses. Course descriptions are available online for parents and students to inform their choice. Parents do not define which college-level topics are suitable within AP courses; AP course and exam materials are crafted by committees of professors and other expert educators in each field. AP courses and exams are then further validated by the American Council on Education and studies that confirm the use of AP scores for college credits by thousands of colleges and universities nationwide.

The AP Program encourages educators to review these principles with parents and students so they know what to expect in an AP course. Advanced Placement is always a choice, and it should be an informed one. AP teachers should be given the confidence and clarity that once parents have enrolled their child in an AP course, they have agreed to a classroom experience that embodies these principles.

About AP

College Board’s Advanced Placement® Program (AP®) enables willing and academically prepared students to pursue college-level studies—with the opportunity to earn college credit, advanced placement, or both—while still in high school. Through AP courses in 38 subjects, each culminating in a challenging exam, students learn to think critically, construct solid arguments, and see many sides of an issue—skills that prepare them for college and beyond. Taking AP courses demonstrates to college admission officers that students have sought the most challenging curriculum available to them, and research indicates that students who score a 3 or higher on an AP Exam typically experience greater academic success in college and are more likely to earn a college degree than non-AP students. Each AP teacher’s syllabus is evaluated and approved by faculty from some of the nation’s leading colleges and universities, and AP Exams are developed and scored by college faculty and experienced AP teachers. Most four-year colleges and universities in the United States grant credit, advanced placement, or both on the basis of successful AP Exam scores; more than 3,300 institutions worldwide annually receive AP scores.

AP Course Development

In an ongoing effort to maintain alignment with best practices in college-level learning, AP courses and exams emphasize challenging, research-based curricula aligned with higher education expectations.

Individual teachers are responsible for designing their own curriculum for AP courses, selecting appropriate college-level readings, assignments, and resources. This course and exam description presents the content and skills that are the focus of the corresponding college course and that appear on the AP Exam. It also organizes the content and skills into a series of units that represent a sequence found in widely adopted college textbooks and that many AP teachers have told us they follow in order to focus their instruction. The intention of this publication is to respect teachers’ time and expertise by providing a roadmap that they can modify and adapt to their local priorities and preferences. Moreover, by organizing the AP course content and skills into units, the AP Program is able

to provide teachers and students with free formative assessments—Progress Checks—that teachers can assign throughout the year to measure student progress as they acquire content knowledge and develop skills.

Enrolling Students: Access, Opportunity, and Readiness

The AP Program welcomes all students willing to challenge themselves with college-level coursework and career preparation. We strongly encourage educators to invite students into AP classes, including students from ethnic, racial, socioeconomic, geographic, or other groups not broadly participating in a school’s AP program. We believe that readiness for AP is attainable, and that educators can expand readiness by opening access to Pre-AP course work. We commit to support educators and communities in their efforts to make AP courses widely available, advancing students in their plans for college and careers.

Offering AP Courses: The AP Course Audit

The AP Program unequivocally supports the principle that each school implements its own curriculum that will enable students to develop the content understandings and skills described in the course framework.

While the unit sequence represented in this publication is optional, the AP Program does have a short list of curricular and resource requirements that must be fulfilled before a school can label a course “Advanced Placement” or “AP.” Schools wishing to offer AP courses must participate in the AP Course Audit, a process through which AP teachers’ course materials are reviewed by college faculty. The AP Course Audit was created to provide teachers and administrators with clear guidelines on curricular and resource requirements for AP courses and to help colleges and universities validate courses marked “AP” on students’ transcripts. This process ensures that AP teachers’ courses meet or exceed the curricular and resource expectations that college and secondary school faculty have established for college-level courses.

The AP Course Audit form is submitted by the AP teacher and the school principal (or designated administrator) to confirm awareness and understanding of the curricular and resource requirements. A syllabus or course outline, detailing how course requirements are met, is submitted by the AP teacher for review by college faculty.

Please visit the [AP Course Audit](#) website for more information to support the preparation and submission of materials for the AP Course Audit.

How the AP Program Is Developed

The scope of content for an AP course and exam is derived from an analysis of hundreds of syllabi and course offerings of colleges and universities. Using this research and data, a committee of college faculty and expert AP teachers work within the scope of the corresponding college course to articulate what students should know and be able to do upon the completion of the AP course. The resulting course framework is the heart of this course and exam description and serves as a blueprint of the content and skills that can appear on an AP Exam.

The AP Test Development Committees are responsible for developing each AP Exam, ensuring the exam questions are aligned to the course framework. The AP Exam development process is a multiyear endeavor; all AP Exams undergo extensive review, revision, piloting, and analysis to ensure that questions are accurate, fair, and valid, and that there is an appropriate spread of difficulty across the questions.

Committee members are selected to represent a variety of perspectives and institutions (public and private, small and large schools and colleges), and a range of gender, racial/ethnic, and regional groups. A list of each subject’s current AP Test Development Committee members is available on [AP Central](#)®.

Throughout AP course and exam development, College Board gathers feedback from various stakeholders in both secondary schools and higher education institutions. This feedback is carefully considered to ensure that AP courses and exams are able to provide students with a college-level learning experience and the opportunity to demonstrate their qualifications for advanced placement or college credit.

How AP Exams Are Scored

The exam scoring process, like the course and exam development process, relies on the expertise of both AP teachers and college faculty. While multiple-choice questions are scored by machine, the free-response questions and through-course performance

assessments, as applicable, are scored by thousands of college faculty and expert AP teachers. Most are scored at the annual AP Reading, while a small portion is scored online. All AP Readers are thoroughly trained, and their work is monitored throughout the Reading for fairness and consistency. In each subject, a highly respected college faculty member serves as Chief Faculty Consultant and, with the help of AP Readers in leadership positions, maintains the accuracy of the scoring standards. Scores on the free-response questions and performance assessments are weighted and combined with the results of the computer-scored multiple-choice questions, and this raw score is converted into a composite AP score on a 1–5 scale.

AP Exams are **not** norm-referenced or graded on a curve. Instead, they are criterion-referenced, which means that every student who meets the criteria for an AP score of 2, 3, 4, or 5 will receive that score, no matter how many students that is. The criteria for the number of points students must earn on the AP Exam to receive scores of 3, 4, or 5—the scores that research consistently validates for credit and placement purposes—include:

- The number of points successful college students earn when their professors administer AP Exam questions to them.
- Performance that researchers have found to be predictive of an AP student succeeding when placed into a subsequent higher-level college course.
- The number of points college faculty indicate, after reviewing each AP question, that they expect is necessary to achieve each AP grade level.

Using and Interpreting AP Scores

The extensive work done by college faculty and AP teachers in the development of the course and exam and throughout the scoring process ensures that AP Exam scores accurately represent students’ achievement in the equivalent college course. Frequent and regular research studies establish the validity of AP scores as follows:

AP Score	Credit Recommendation	College Grade Equivalent
5	Extremely well qualified	A
4	Well qualified	A-, B+, B
3	Qualified	B-, C+, C
2	Possibly qualified	n/a
1	No recommendation	n/a

While colleges and universities are responsible for setting their own credit and placement policies, most private colleges and universities award credit and/or advanced placement for AP scores of 3 or higher. Additionally, most states in the U.S. have adopted statewide credit policies that ensure college credit for scores of 3 or higher at public colleges and universities. To confirm a specific college's AP credit/placement policy, use the search engine available on the [AP Credit Policy Search](#) page.

BECOMING AN AP READER

Each June, thousands of AP teachers and college faculty members from around the world gather for seven days in multiple locations to evaluate and score the free-response sections of the AP Exams. Ninety-eight percent of surveyed educators who took part in the AP Reading say it was a positive experience.

There are many reasons to consider becoming an AP Reader, including opportunities to:

- **Bring positive changes to the classroom:** Surveys show that the vast majority of returning AP Readers—both high school and college

educators—make improvements to the way they teach or score because of their experience at the AP Reading.

- **Gain in-depth understanding of AP Exam and AP scoring standards:** AP Readers gain exposure to the quality and depth of the responses from the entire pool of AP Exam takers, and thus are better able to assess their students' work in the classroom.
- **Receive compensation:** AP Readers are compensated for their work during the Reading. Expenses, lodging, and meals are covered for Readers who travel.
- **Score from home:** AP Readers have online distributed scoring opportunities for certain subjects. Check the [AP Reader](#) site for details.
- **Earn Continuing Education Units (CEUs):** AP Readers earn professional development hours and CEUs that can be applied to PD requirements by states, districts, and schools.

How to Apply

Visit the [Become an AP Reader](#) site for eligibility requirements and to start the application process.

AP Resources and Supports

By completing a simple activation process at the start of the school year, teachers and students receive access to a robust set of classroom resources.

AP Classroom

AP Classroom is a dedicated online platform designed to support teachers and students throughout their AP experience. The platform provides a variety of powerful resources and tools to provide yearlong support to teachers and enable students to receive meaningful feedback on their progress.

UNIT GUIDES

Appearing in this publication and on AP Classroom, these planning guides outline all required course content and skills, organized into commonly taught units. Each unit guide suggests a sequence and pacing of content, scaffolds skill instruction across units, and organizes content into topics.

PROGRESS CHECKS

Formative AP questions for every unit provide feedback to students on the areas where they need to focus. Available online, Progress Checks measure knowledge and skills through multiple-choice questions with rationales to explain correct and incorrect answers, and free-response questions with scoring information.

PROGRESS DASHBOARD

This dashboard allows teachers to review class and individual student progress throughout the year. Teachers can view class trends and see where students struggle with content and skills that will be assessed on the AP Exam. Students can view their own progress over time to improve their performance before the AP Exam.

AP QUESTION BANK

This online library of real AP Exam questions provides teachers with secure questions to use in their classrooms. Teachers can find questions indexed by course topics and skills, create customized tests, and assign them online or on paper. These tests enable students to practice and get feedback on each question.

Digital Activation

In order to teach an AP class and make sure students are registered to take the AP Exam, teachers must first complete the digital activation process. Digital activation gives students and teachers access to resources and gathers students' exam registration information online, eliminating most of the answer sheet bubbling that has added to testing time and fatigue.

AP teachers and students begin by signing in to **My AP** and completing a simple activation process at the start of the school year, which provides access to all AP resources, including AP Classroom.

To complete digital activation:

- Teachers and students sign in to or create their College Board accounts.
- Teachers confirm that they have added the course they teach to their AP Course Audit account and have had it approved by their school's administrator.
- Teachers or AP Coordinators, depending on who the school has decided is responsible, set up class sections so students can access AP resources and have exams ordered on their behalf.
- Students join class sections with a join code provided by their teacher or AP Coordinator.
- Students will be asked for additional registration information upon joining their first class section, which eliminates the need for extensive answer sheet bubbling on exam day.

While the digital activation process takes a short time for teachers, students, and AP Coordinators to complete, overall it helps save time and provides the following additional benefits:

- **Access to AP resources and supports:** Teachers have access to resources specifically designed to support instruction and provide feedback to students throughout the school year as soon as activation is complete.
- **Streamlined exam ordering:** AP Coordinators can create exam orders from the same online class rosters that enable students to access resources. The coordinator reviews, updates, and submits this information as the school's exam order in the fall.
- **Student registration labels:** For each student included in an exam order, schools will receive a set of personalized AP ID registration labels, which replaces the AP student pack. The AP ID connects a student's exam materials with the registration information they provided during digital activation, eliminating the need for pre-administration sessions and reducing time spent bubbling on exam day.
- **Targeted Instructional Planning Reports:** AP teachers will get Instructional Planning Reports (IPRs) that include data on each of their class sections automatically rather than relying on special codes optionally bubbled in on exam day.

Instructional Model

Integrating AP resources throughout the course can help students develop the historical thinking skills and conceptual understandings. The instructional model outlined below shows possible ways to incorporate AP resources into the classroom.

Plan

Teachers may consider the following approaches as they plan their instruction before teaching each unit.

- Use the **Unit at a Glance** table to identify related topics that build toward a common understanding, and then plan appropriate pacing for students.
- Identify useful strategies in the **Instructional Approaches** section to help teach the concepts and skills.

Teach

When teaching, supporting resources could be used to build students' conceptual understanding and their mastery of skills.

- Use the topic pages in the **unit guides** to identify the required content.
- Integrate the content with a skill, considering any appropriate scaffolding.
- Employ any of the instructional strategies previously identified.
- Use the available resources on the topic pages to bring a variety of assets into the classroom.

Assess

Teachers can measure student understanding of the content and skills covered in the unit and provide actionable feedback to students.

- At the end of each unit, use **AP Classroom** to assign students the online **Progress Checks**, as homework or as an in-class task.
- Provide question-level feedback to students through answer rationales; provide unit- and skill-level feedback using the progress dashboard.
- Create additional practice opportunities using the **AP Question Bank** and assign them through **AP Classroom**.

About the AP European History Course

In AP European History, students investigate significant events, individuals, developments, and processes from approximately 1450 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change over time. The course also provides seven themes that students explore throughout the course in order to make connections among historical developments in different times and places: interaction of Europe and the world, economic and commercial development, cultural and intellectual development, states and other institutions of power, social organization and development, national and European identity, and technological and scientific innovations.

College Course Equivalent

AP European History is designed to be the equivalent of an introductory college or university survey of modern European history.

Prerequisites

There are no prerequisites for AP European History. Students should be able to read a college-level textbook and write grammatically correct, complete sentences.

AP EUROPEAN HISTORY

Course Framework

Introduction

The AP European History course outlined in this framework reflects a commitment to what history teachers, professors, and researchers have identified as the main goal of a college-level modern European history survey course: learning to analyze and interpret historical evidence to achieve understanding of major developments in European history.

The *AP European History Course and Exam Description* defines what representative colleges and universities have said students should know and be able to do in order to earn college credit or placement. Students practice the thinking skills used by historians by studying primary and secondary source evidence, analyzing a wide array of historical evidence and perspectives, and expressing historical arguments in writing.

Although the course framework is designed to provide a clear and detailed description of the course content and skills, it is not a complete curriculum. Teachers create their own local curriculum to meet the needs of their students and any state or local requirements.

Course Framework Components

Overview

This course framework provides a description of what students should know and be able to do to qualify for college credit or placement.

The course framework includes two essential components:

1 HISTORICAL THINKING SKILLS AND REASONING PROCESSES

The historical thinking skills and reasoning processes are central to the study and practice of European history. Students should practice and develop these skills and processes on a regular basis over the span of the course.

2 COURSE CONTENT

The course content is organized into commonly taught units of study that provide a suggested sequence for the course. These units comprise the content and conceptual understandings that colleges and universities typically expect students to master to qualify for college credit and/or placement. This content is grounded in themes, which are cross-cutting concepts that build conceptual understanding and spiral throughout the course.

AP EUROPEAN HISTORY

Historical Thinking Skills and Reasoning Processes

This section presents the historical thinking skills and reasoning processes that students should develop during the AP history courses and that form the basis of the tasks on the AP history exams.

Historical Thinking Skills

The AP historical thinking skills describe what students should be able to do while exploring course concepts. The table that follows presents these skills, which students should develop during the AP European History course.

The unit guides later in this publication embed and spiral these skills throughout the course, providing teachers with one way to integrate the skills in the course content with sufficient repetition to prepare students to transfer those skills when taking the AP Exam.

More detailed information about teaching the historical thinking skills can be found in the Instructional Approaches section of this publication.

AP EUROPEAN HISTORY

Course Content

Influenced by the Understanding by Design® (Wiggins and McTighe) model, this course framework provides a description of the course requirements necessary for student success.

The course content is organized into commonly taught units. The units have been arranged in a logical sequence frequently found in many college courses and textbooks.

The nine units in AP European History, and their approximate weighting on the AP Exam, are listed on the following page.

Pacing recommendations at the unit level and in the Course at a Glance provide suggestions for how to teach the required course content and administer the Progress Checks. The suggested class periods are based on a schedule in which the class meets five days a week for 45 minutes each day. While these recommendations have been made to aid planning, teachers should of course adjust the pacing based on the needs of their students, alternate schedules (e.g., block scheduling), or their school's academic calendar.

TEACHING EARLIER PERIODS

AP European History focuses on topics in modern European history from the mid-15th century through the 21st century, and the AP European History Exam assesses understanding of only those topics. However, to gain a deeper appreciation of the themes and patterns in European history, many teachers find it useful to introduce the course with elements of earlier periods, such as ancient, classical, or medieval history. Information on Greek and Roman attitudes, for example, would help students understand the significance of how Renaissance artists and scholars made use of ancient thought in their work. Similarly, a discussion of Catholic theology from Augustine through the late middle ages would help students appreciate the impact of such thought on later European intellectual, cultural, social, and political beliefs as well as religious conflicts during the Reformation and the wars of religion. Exposure to primary and secondary sources in these periods would also give students more practice with the skill of analyzing historical evidence. Using earlier periods to establish the thematic foundations of the course can help students deepen their understanding of modern Europe's history.

TOPICS

Each unit is broken down into teachable segments called topics. The topic pages (starting on p. 38) contain all required content for each topic. Although most topics can be taught in one or two class periods, teachers are again encouraged to pace the course to suit the needs of their students and school.

In order for students to develop an understanding of these topics, teachers select specific historical figures, groups, and events—and the primary and secondary source documents through which they can be examined—that enable students to investigate them. In this way, AP teachers create their own local curricula for AP European History.

Unit 9: Cold War and Contemporary Europe		10–15%

*Events, processes, and developments are not constrained by the given dates and may begin before, or continue after, the approximate dates assigned to each unit and/or topic.

Themes

The themes serve as the connective tissue of the course and enable students to create meaningful connections across units. They are often broader ideas that become threads that run throughout the course. Revisiting the themes and applying them in a variety of contexts helps students to develop deeper conceptual understanding. Below are the themes of the course and a brief description of each.

THEME 1: INTERACTION OF EUROPE AND THE WORLD (INT)

Motivated by a variety of factors, Europe's interaction with the world led to political, economic, social, and cultural exchanges that influenced both European and non-European societies.

THEME 2: ECONOMIC AND COMMERCIAL DEVELOPMENTS (ECD)

Economic development, especially the development of capitalism, played an important role in Europe's history, often having significant social, political, and cultural effects.

THEME 3: CULTURAL AND INTELLECTUAL DEVELOPMENTS (CID)

The creation and transmission of knowledge, including the relationship between traditional sources of authority and the development of differing world views, had significant political, intellectual, economic, cultural, and social effects on European and world societies.

THEME 4: STATES AND OTHER INSTITUTIONS OF POWER (SOP)

Unit Guides

Introduction

The structure of the unit guides respects new AP teachers' time by providing one possible sequence they can adopt or modify rather than having to build from scratch. An additional benefit is that these units enable the AP Program to provide interested teachers with formative assessments—the Progress Checks—that they can assign their students at the end of each unit to gauge progress toward success on the AP Exam. However, experienced AP teachers who are satisfied with their current course organization and exam results should feel no pressure to adopt these units, which comprise an optional sequence for this course.

The **Unit at a Glance table** shows the topics, related thematic focus, suggested skills, and reasoning processes for each topic. The class periods column has been left blank so that teachers can customize the time they spend on each topic.

The **suggested skill** for each topic shows one way teachers can link the content in that topic to a specific AP historical thinking skill. The individual skill has been thoughtfully chosen in a way that helps spiral the skills throughout the course. The questions on the Progress Checks are based on this pairing. However, AP Exam questions may pair the content with any of the skills.

SAMPLE INSTRUCTIONAL ACTIVITIES

The sample activities on this page are optional and are offered to provide possible ways to incorporate instructional approaches into the classroom. They were developed in partnership with teachers from the AP community to share ways that they approach teaching some of the topics in this unit. Please refer to the Instructional Approaches section beginning on p. 213 for more examples of activities and strategies.

Activity	Topic	Sample Activity
1	1.2	Discussion Group Pose the following learning objective as a question: Explain how the revival of classical texts contributed to the development of the Renaissance in Italy (Unit 1: Learning Objective B). Have students form discussion groups to answer the question.
2	1.3	Close Reading When students are reading documents with unfamiliar vocabulary (such as Erasmus), have them perform a close reading, highlighting relevant words and passages that support the author's claim.
3	1.7 and 1.8	Think-Pair-Share Have students analyze the different motivations for European colonial expansion.
4	1.11	Making Connections Have students practice making connections by writing causes and effects related to the Renaissance and the Age of Discovery on cards. Place the cards into a box and have students pick a card at random. Give them a few minutes to gather and recall information about the cause or effect, and then ask them to find the connection between their concepts in pairs. Finally, ask each student pair to write a brief explanation of how the concepts are related.

Unit Planning Notes

Use the space below to plan your approach to the unit. Consider how to help students connect their identification and description of arguments and evidence in primary sources to developing their own claims and supporting evidence.

The sample activities on this page are optional and are offered to provide possible ways to incorporate instructional approaches into the classroom. They were developed in partnership with teachers from the AP community to share ways that they approach teaching some of the topics in this unit. Please refer to the Instructional Approaches section beginning on p. 213 for more examples of activities and strategies.

Activity	Topic	Sample Activity
1	2.2	Quickwrite Have students identify and describe evidence used by Luther to support his argument in one of his early writings on the problems in the Catholic Church.
2	2.3 and 2.5	Fishbowl Have students discuss the arguments presented in various religious documents during the Reformation and the Counter-Reformation/Catholic Reformation, focusing on how the documents relate to common topics or themes.
3	2.4	Guided Discussion Use brainstorming and quickwrite as strategies during a guided discussion about the various motivations and patterns for participation in European wars of religion.
4	2.8	Matching Claims and Evidence In early stages of practicing argumentation, ask small groups of students to write claims and provide supporting evidence statements based on a prompt about causation in the Age of Reformation or the wars of religion. Have groups trade claims and evidence and then revise or modify the claims (if necessary), match the claims and evidence, and write statements explaining why the evidence supports the claim.

2	3.3	Create Representation Give students a set of data, such as rates of production in putting-out or cottage industries in the 1600s, and have them create a graph that best shows the data and the trends.
3	3.6 and 3.7	Jigsaw Have students share information about various types of government in this period. Have students read and analyze primary and secondary sources related to various rulers and ask them to explain how each ruler represents absolutism or constitutionalism.
4	3.8	Graphic Organizer Have students use a graphic organizer, such as a Venn diagram, to analyze four documents related to types of government (such as writings by Louis XIV, Peter the Great, or King James I of England). Have students determine whether the documents support an absolutist or constitutional form of rule, or both.

TOPIC 4.4

18th-Century Society and Demographics

Required Course Content

THEMATIC FOCUS

Social Organization and Development **SCD**

Economic, political, and cultural factors have influenced the form and status of family, class, and social groups in European history, which has, in turn, affected both the individual and society.

LEARNING OBJECTIVE

Unit 4: Learning Objective E

Explain the factors contributing to and the consequences of demographic changes from 1648 to 1815.

HISTORICAL DEVELOPMENTS

KC-2.4.I

In the 17th century, small landholdings, low-productivity agricultural practices, poor transportation, and adverse weather limited and disrupted the food supply, causing periodic famines. By the 18th century, the balance between population and the food supply stabilized, resulting in steady population growth.

KC-2.4.I.A

By the middle of the 18th century, higher agricultural productivity and improved transportation increased the food supply, allowing populations to grow and reducing the number of demographic crises (a process known as the Agricultural Revolution).

KC-2.4.I.B

In the 18th century, plague disappeared as a major epidemic disease, and inoculation reduced smallpox mortality.

KC-2.4.III.A

Although the rate of illegitimate births increased in the 18th century, population growth was limited by the European marriage pattern, and in some areas by various birth control methods.

LEARNING OBJECTIVE

Unit 4: Learning Objective E

Explain the factors contributing to and the consequences of demographic changes from 1648 to 1815.

HISTORICAL DEVELOPMENTS

KC-2.4.III.B

As infant and child mortality decreased, and commercial wealth increased, families dedicated more space and resources to children and child-rearing, as well as private life and comfort.

KC-2.4.IV

Cities offered economic opportunities, which attracted increasing migration from rural areas, transforming urban life and creating challenges for the new urbanites and their families.

KC-2.4.IV.A

The Agricultural Revolution produced more food using fewer workers; as a result, people migrated from rural areas to the cities in search of work.

KC-2.4.IV.B

The growth of cities eroded traditional communal values, and city governments strained to provide protection and a healthy environment.

KC-2.4.IV.C

The concentration of the poor in cities led to a greater awareness of poverty, crime, and prostitution as social problems, and prompted increased efforts to police marginal groups.

SAMPLE INSTRUCTIONAL ACTIVITIES

The sample activities on this page are optional and are offered to provide possible ways to incorporate instructional approaches into the classroom. They were developed in partnership with teachers from the AP community to share ways that they approach teaching some of the topics in this unit. Please refer to the Instructional Approaches section beginning on p. 213 for more examples of activities and strategies.

Activity	Topic	Sample Activity
1	5.3	Socratic Seminar Use the learning objective for this topic (Explain the economic and political consequences of the rivalry between Britain and France from 1648 to 1815.) to initiate discussion where students can illustrate their understanding. Challenge students to consult a primary or secondary source used during your lesson to support their positions.
2	5.5	Self/Peer Revision Have students write a partial document-based question (with four documents) based on the effects of the French Revolution. As students work through their arguments, have them perform self- or peer revisions of their practice essays. That way, they have the opportunity to review their practice claims, supporting evidence, and sourcing.
3	5.6	Debate Have students debate whether Napoleon was a tyrant or a liberator using evidence and reasoning to support their claims.
4	5.9	Making Connections On notecards, write concepts related to the political and social upheaval during the 18th century. Place the cards into a box and have students pick a concept at random. Give students a few minutes to gather and recall information about the concept and then ask them to find the connection between their concepts in pairs. Finally, ask the pairs to write a brief explanation of how the concepts are related.

2	6.5	Graphic Organizer Use a concept web to help students make connections between industrialization and the concert of Europe and European conservatism.
3	6.8	Debrief Lead students in a debrief on the various social reforms of the 19th-century to ensure their understanding. Encourage students to ask questions to clarify their understanding. End the debrief with a short writing activity or exit ticket.
4	6.10	Socratic Seminar Ask the question <i>What were the most significant effects of capitalism's development?</i> to initiate discussion where students can illustrate their understanding. Have students refer to arguments from primary sources used in this unit.

SAMPLE INSTRUCTIONAL ACTIVITIES

The sample activities on this page are optional and are offered to provide possible ways to incorporate instructional approaches into the classroom. They were developed in partnership with teachers from the AP community to share ways that they approach teaching some of the topics in this unit. Please refer to the Instructional Approaches section beginning on p. 213 for more examples of activities and strategies.

Activity	Topic	Sample Activity
1	9.2, 9.3, 9.4, and 9.5	Jigsaw Use this strategy to facilitate understanding of post-World War II Europe around the following themes: economic and commercial development, interactions between Europe and the world, and national and European identity. Have students read and analyze primary and secondary sources related to rebuilding postwar Europe, the Cold War, and postwar nationalism and ethnic conflict.
2	9.8	Fishbowl Use this strategy to discuss the arguments presented in various primary and secondary sources focusing on changes and continuities in the roles and status of women in Europe throughout the 20th and 21st centuries.
3	9.10	Think-Pair-Share Have students analyze the causes and effects of the formation of the European Union by posing a question such as <i>Explain how the formation and existence of the European Union influenced economic developments throughout the period following World War II to the present.</i> After students have shared their responses with a partner, engage the class in a group discussion to discover which causes and effects they used as examples and to enhance student understanding.
4	9.15	Self/Peer Revision Have students work through writing components of a full practice document-based question (claim, evidence both within and beyond the documents, sourcing, historical reasoning, and addressing alternative perspectives demonstrating a complex understanding) on the changes and continuities in 20th-century European society and then have them perform self- or peer revisions of their practice-argument essays. That way, they have the opportunity to review and assess their own argument and their peers'.

AP EUROPEAN HISTORY

Instructional Approaches

Selecting and Using Course Materials

Using a wide array of historical source material helps students become proficient with the historical thinking skills and develop a conceptual understanding of European history. In addition to using a college-level textbook that will provide required course content, students should regularly examine primary source material in different and varied forms as well as other types of historical scholarship. Rich, diverse source material provides more flexibility in designing learning activities that develop the habits of historical thinking that are essential for student success in the course.

Textbooks

The AP European History course requires the use of a college-level textbook that includes a discussion of historical developments and processes from c. 1450 into the 21st century in a way that encourages conceptual understanding. While nearly all college-level European history textbooks address the various themes of European history, they may cover these thematic approaches differently. It will be important to identify other types of secondary sources and supplement the textbook accordingly.

AP Central has a [list of textbook examples](#) that meet the resource requirements.

Primary Sources

Students will find it useful to analyze primary source material regularly to deepen their understanding of the key concepts addressed by the textbook and develop the required skills. While publishers are increasingly including primary source material in the textbook, students should be introduced to a wide variety of source material so they can analyze historical evidence from diverse sources. These sources should include written documents as well as images, such as photographs, cartoons, and works of art. The ancillary materials and online sources that accompany most of the recently published textbooks may have high-quality primary source documents, artwork, charts, and other sources of data that are linked to the topics and themes

addressed in the textbook. If the textbook used does not provide ample primary sources, or the sources are too brief, teachers may decide to supplement their course with document readers that provide lengthier selections or online compilations of primary sources related to particular topic areas.

Secondary Sources

Student success in the course also depends on exposure to and analysis of multiple secondary sources. Secondary sources include accounts of the past written by historians or scholars of other related disciplines, such as economists, sociologists, political commentators, or art historians, who were not present during the events or who are analyzing history today. Secondary sources include data sets, charts, and maps as well. Secondary sources of all types can provide a broader and more substantive perspective on topics addressed by a textbook. Additionally, secondary sources can be helpful in supplementing textbooks with older publication dates.

It is especially important that students receive instruction in the practice of analyzing and comparing historians' interpretations of events. Students should have opportunities to compare a primary source with a secondary source or compare the views represented by two different secondary sources. This need can often be met by source collections that provide both primary and secondary source material or through ancillary resource material offered by textbook publishers. When finding resources to use with students, teachers may consider a variety of sources that vary in complexity, building toward publications by practicing historians, university presses, or scholarly journals.

School librarians can also help identify databases that contain a variety of useful primary and secondary source material. Many schools already subscribe to databases, such as ABC-CLIO, JSTOR, EBSCO, or Gale, that may augment the materials found in texts or source collections.

Instructional Strategies

The AP European History course framework outlines the concepts and skills students must master in order to be successful on the AP Exam. To address those concepts and skills effectively, it helps to incorporate a variety of instructional approaches into daily lessons and activities. The following table presents strategies that can help students apply their understanding of course concepts.

Strategy	Definition	Purpose	Example
<i>Close Reading</i>	Students read, reread, and analyze small chunks of text word for word, sentence by sentence, and line by line.	Develops comprehensive understanding of a text.	When students are reading early documents with unfamiliar vocabulary, have them highlight relevant words and passages that support the author's claim. Teachers can also read a difficult primary or secondary source aloud to students to help them understand the content and author's tone.
<i>Create Representations</i>	Students create tables, graphs, or other infographics to interpret text or data.	Helps students organize information using multiple ways to present data.	Give students a set of data (e.g., numbers of factories or city populations) and have them create a graph that best shows the data and the trends.
<i>Critique Reasoning</i>	Through collaborative discussion, students critique the arguments of others, questioning the author's perspective, evidence presented, and reasoning behind the argument.	Helps students learn from others as they make connections between concepts and learn to support their arguments with evidence and reasoning that make sense to peers.	Have students critique Bishop Bossuet's arguments in his writings on the divine right of kings. Have students examine Bossuet's perspective and the evidence and reasoning he uses to support this position.
<i>Debate</i>	Students present an informal or formal argument that defends a claim with reasons, while others defend different claims about the same topic or issue. The goal is to debate ideas without attacking the people who defend those ideas.	Gives students an opportunity to collect and orally present evidence supporting the affirmative and negative arguments of a proposition or issue.	Have students debate whether Napoleon was a tyrant or a liberator using evidence and reasoning to support their claims.

Strategy	Definition	Purpose	Example
<i>Debriefing</i>	Students participate in a facilitated discussion that leads to consensus understanding or helps them identify the key conclusions or takeaways.	Helps students solidify and deepen their understanding.	For complex issues such as philosophies, lead students in a debrief to ensure their understanding.
<i>Discussion Groups</i>	Students engage in an interactive, small-group discussion, often with an assigned role (e.g., questioner, summarizer, facilitator, evidence keeper) to consider a topic, text, question, etc.	Helps students gain new understanding of or insight into a text or issue by listening to multiple perspectives.	Use the learning objectives, such as “Explain how the revival of classical texts contributed to the development of the Renaissance in Italy,” (Unit 1: Learning Objective B) to help students gain information and show their understanding.
<i>Fishbowl</i>	Some students form an inner circle and model appropriate discussion techniques while an outer circle of students listens, responds, and evaluates.	Provides students with an opportunity to engage in a formal discussion and to experience the roles of both participant and active listener; students also have the responsibility of supporting their opinions and responses using specific evidence.	Use this strategy to discuss the arguments presented in various religious documents during the Reformation and the Counter-Reformation, focusing on how the documents relate to common topics or themes.
<i>Graphic Organizer</i>	Students use a visual representation for the organization of information (e.g., Venn diagrams, flowcharts, cluster maps).	Builds comprehension and facilitates discussion by representing information in visual form.	Ask students to use a graphic organizer to compare political, economic, religious, social, intellectual, and technological ideas. Make sure students use any organizer thoughtfully and are not simply “filling in the blanks.” Concept webs or timelines are useful types of graphic organizers for having students discuss causation and continuity and/or change over time.
<i>Guided Discussion</i>	A guided discussion is an umbrella strategy that allows for the use of different techniques as you guide students through the lesson.	Helps students see the big picture and builds their confidence when dealing with difficult content and/or new skills.	Use brainstorming and quickwrite as strategies during a guided discussion to help students understand the various motivations and patterns for participation in European wars of religion.

continued on next page

Strategy	Definition	Purpose	Example
<i>Jigsaw</i>	Each student in a group reads a different text or different passage from a single text, taking on the role of “expert” on what was read. Students share the information from that reading with students from other groups and then return to their original groups to share their new knowledge.	Helps students summarize and present information to others in a way that facilitates an understanding of a text (or multiple texts) or issue without having each student read the text in its entirety; by teaching others, they become experts.	Use this strategy to facilitate understanding of the various objectives and accomplishments of one of the 19th-century reform movements. Have students read and analyze primary and secondary sources related to political corruption, social injustice, and economic inequality.
<i>Look for a Pattern</i>	Students evaluate data or create visual representations to find a trend.	Helps students identify patterns that may be used to draw conclusions.	Using a complex graph (with at least two data sets, such as mobilization numbers for each country during World War I versus their total number of casualties), have students compare the data to find a trend and draw a conclusion.
<i>Making Connections</i>	Students are given a concept, term, or document and asked to write what they know about it. Then students are paired and asked to determine, describe, and then explain the connection between the two concepts.	Reinforces the fact that concepts are often connected and provides the opportunity for students to make and explain connections between and among these concepts.	Write concepts related to one of the course themes (such as economics or politics) on cards, place them into a box, and have students pick a concept at random. Give students a few minutes to gather and recall information about the term and then pair students and ask them to find the connection between their concepts. Finally, ask the pairs to write a brief explanation of how the concepts are related.
<i>Match Claims and Evidence</i>	Students are given sample claims (most of which can be improved upon) to evaluate and revise. Then students match their revised claims with pieces of evidence that can be used to support the claims. Once matched, students write a statement explaining how and why the evidence supports the claim.	Provides opportunities for students to edit existing claims and match those claims with existing evidence in preparation for writing their own argumentative essays.	In early stages of practicing argumentation, ask small groups of students to write claims and supporting-evidence statements based on a prompt. Have groups trade claims and evidence and revise or modify the claims (if necessary), match the claims and evidence, and write statements explaining why the evidence supports the claim.

continued on next page

Strategy	Definition	Purpose	Example
<i>Questioning a Source</i>	Students develop literal, interpretive, and universal questions about the text while reading a text.	Allows students to engage more actively with texts, read with greater purpose and focus, and ultimately answer questions to gain greater insight into the text.	Assign students to read and analyze propaganda posters from either World War I or II and write down any clarification and discussion questions that come to mind while reading the text. Form groups around similar questions and ask students to research answers from a source, such as the textbook. Have groups present their findings and lead a discussion about motivations, nationalism, and “the home front” during the war.
<i>Quickwrite</i>	Students write for a short, specific amount of time about a designated topic.	Helps students generate ideas in a short time.	As preparation for the free-response questions, use the learning objectives to have students write claims and explain evidence that supports their claims for various topics.
<i>Self/Peer Revision</i>	Students work alone or with a partner to examine a piece of writing for accuracy and clarity.	Provides students an opportunity for editing a written text to ensure correctness of identified components.	As students work through writing components of their arguments (claims, evidence, historical reasoning, sourcing, etc.), have them perform self- or peer revisions of their practice-argument essays, so that they have the opportunity to review their practice claims, supporting evidence, sourcing, and analysis and reasoning.
<i>Socratic Seminar</i>	Students engage in a focused discussion tied to a topic or selected text in which they ask questions of one another. The questions initiate a conversation that continues with a series of responses and additional questions.	Helps students arrive at a new understanding by asking questions that clarify; challenging assumptions; probing perspective and point of view; questioning facts, reasons, and evidence; or examining implications and outcomes.	Use the essential questions at the start of each unit to initiate discussion where students can illustrate their understanding of the learning objectives and essential knowledge statements.
<i>Think-Pair-Share</i>	Students think through a question or issue alone, pair with a partner to share ideas, and then share results with the class.	Enables the development of initial ideas that are then tested with a partner in preparation for revising ideas and sharing them with a larger group.	Have students use think-pair-share to analyze the causes and effects of the formation of the European Union.

Developing Historical Thinking Skills

Throughout the AP European History course, students will develop skills that are fundamental to the study of history. Since these historical thinking skills represent the complex skills that adept historians demonstrate, students will benefit from multiple opportunities to develop them in a scaffolded manner.

The historical thinking skills and reasoning processes used in the course framework help students begin to understand and create historical arguments in a

process similar to that used by historians. This process begins with a close analysis of historical sources and reaches its conclusion when evidence, drawn from historical sources, is used effectively to support an argument about the past.

The tables on the pages that follow look at each of the skills and provide examples of tasks or questions for each skill, along with instructional notes and strategies for implementing that skill into the course.

Historical Thinking Skill 1: Identify and explain historical developments and processes

Historical knowledge is gained from a variety of formats: knowledge transfer from the teacher, reading textbooks, analyzing primary and secondary sources, and from other media. In order to perform historical analysis and argumentation, students need to establish a depth of knowledge about historical events, processes, and people and their actions. This skill allows students to gain empirical knowledge that they can then apply using more sophisticated skills.

Skill	Tasks/Questions	Sample Activity	Instructional Strategies
1.A <i>Identify a historical concept, development, or process.</i>	<ul style="list-style-type: none"> Identify the characteristics and traits of a concept, development, or process. What does the historical evidence tell you about a concept, development, or process? 	Ask students to read the Declaration of the Rights of Man and Citizen and identify the sentiments expressed by the authors.	<ul style="list-style-type: none"> Quickwrite Think-Pair-Share
1.B <i>Explain a historical concept, development, or process.</i>	<ul style="list-style-type: none"> Begin to think about causation and patterns of continuity and change over time. Using specific historical evidence, explain how and why a historical concept, development, or process emerged. 	Ask students to explain the immediate causes of the French Revolution.	<ul style="list-style-type: none"> Quickwrite Graphic Organizer

Historical Thinking Skill 2: Analyze sourcing and situation of primary and secondary sources

Historians use primary sources and the arguments of other historians (secondary sources) as the foundation for creating an understanding about historical events—in short, a historical argument. Sources need to be closely evaluated so that they can be used properly to support, refute, or even modify an argument. By using these skills, students will build an understanding of source analysis that they can later use in developing their own historical arguments. Good analysis requires a critical evaluation of the source's limitations.

Skill	Tasks/Questions	Sample Activity	Instructional Strategies
2.A <i>Identify a source's point of view, purpose, historical situation, and/or audience.</i>	<ul style="list-style-type: none"> Identify the author. Identify his or her perspective. Identify the intended audience. Identify the purpose. Place the source within its historical situation. 	Lead students on a guided reading of Martin Luther's 95 Theses. Ask them to identify the author and his perspective (point of view). Then ask students to identify the historical situation surrounding when the source was written.	<ul style="list-style-type: none"> Critique Reasoning Jigsaw
2.B <i>Explain the point of view, purpose, historical situation, and/or audience of a source.</i>	<p>Explain the many different variables that impact a source's:</p> <ul style="list-style-type: none"> Content Tone Interpretation Audience Purpose 	Ask students to examine the factors that led Luther to respond to the Catholic Church the way he did during that period.	<ul style="list-style-type: none"> Questioning a Source Socratic Seminar
2.C <i>Explain the significance of a source's point of view, purpose, historical situation, and/or audience, including how these might limit the use(s) of a source.</i>	<ul style="list-style-type: none"> Why does the source's point of view, purpose, historical situation, and audience matter? How could a historian use this source to develop an argument? What does the source not tell you? How does the tone and/or audience of a source affect its value to historians? 	Have students analyze a 19th-century advice book or pamphlet aimed at women (such as Mrs. Beeton's <i>Book of Household Management</i>) and explain how the audience and historical situation affects the significance of this source.	<ul style="list-style-type: none"> Discussion Groups Quickwrite Think-Pair-Share

Historical Thinking Skill 3: Analyze arguments in primary and secondary sources

Because historians rely on primary and secondary sources to serve as evidence to support their claims, they need to closely analyze these sources. This analysis includes investigating what the source does and does not communicate, determining the argument established by a source, and identifying the evidence the author uses to support that argument.

Skill	Tasks/Questions	Sample Activity	Instructional Strategies
3.A <i>Identify and describe a claim and/or argument in a text-based or non-text-based source.</i>	<ul style="list-style-type: none"> What is the author's argument? What is the author trying to prove in the source? 	Ask students to identify James I of England's claims in <i>The True Law of Free Monarchies</i> .	<ul style="list-style-type: none"> Debriefing
3.B <i>Identify the evidence used in a source to support an argument.</i>	<ul style="list-style-type: none"> What is the source's argument? What specific evidence does the author use to support the argument? 	Ask students to identify the evidence James I of England uses to support his claims about rulers and their subjects in <i>The True Law of Free Monarchies</i> .	<ul style="list-style-type: none"> Critique Reasoning
3.C <i>Compare the arguments or main ideas of two sources.</i>	<ul style="list-style-type: none"> Identify the argument or main idea in each source. What are the similarities between the arguments or main ideas in each source? What are the differences between the arguments or main ideas in each source? 	Have students compare the views of several Enlightenment thinkers on government, liberty, and the state of nature.	<ul style="list-style-type: none"> Fishbowl
3.D <i>Explain how claims or evidence support, modify, or refute a source's argument.</i>	<ul style="list-style-type: none"> Explain the source's claim. Explain the evidence presented in the source. Explain how the outside evidence supports the claims in the source. Explain how the outside evidence contradicts the source's claim. 	Ask students to explain the arguments made in the Declaration of the Rights of Man and Citizen. What outside evidence supports and refutes the claims made?	<ul style="list-style-type: none"> Close Reading

Historical Thinking Skill 4: Analyze the context of historical events, developments, or processes

Historical events, developments, and processes do not happen in a vacuum. They cannot be understood without proper examination within the relevant context. While students are often taught to focus on comparison, causality, and patterns of continuity and change over time as ways to look at these events, historical context also plays a part. Analyzing historical events using context helps students see the big picture and make the connections they will need to make when developing thoughtful arguments. These skills guide students through the process of contextual analysis.

Skill	Tasks/Questions	Sample Activity	Instructional Strategies
<p>4.A <i>Identify and describe a historical context for a specific historical development or process.</i></p>	<ul style="list-style-type: none"> ▪ What events led up to the one being studied? ▪ What else is happening in Europe or the world at this time? 	<p>Have students examine one of William Hogarth’s illustrations on poverty in British cities. <p>4.B <i>Explain how a specific historical development or process is situated within a broader historical context.</i></p>	<ul style="list-style-type: none"> ▪ Ask students to use historical reasoning to explain how an event relates to a broader process. ▪ Consider the evidence through the lens of another historical event or development. ▪ How does the relationship affect the event being studied? ▪ What does the source tell us about the time in which it was created? ▪ Examine the evidence through the lens of another historical event or development. ▪ How can this evidence be used to explain other related historical events? 	<p>Have students examine Lenin’s April Theses in the context of both the Russian Revolution and World War I. Extend this discussion to include relating Lenin’s plans to the 19th-century “isms” and the emancipation of the Russian serfs.</p> <p>Challenge students to look at events and processes both inside and outside of Russia.</p>	<ul style="list-style-type: none"> ▪ Close Reading ▪ Socratic Seminar

Historical Thinking Skill 5: Using historical reasoning processes (comparison, causation, continuity and change), analyze patterns and connections between and among historical developments and processes

Analyzing patterns and making connections is the bridge between all of the previous historical thinking skills. This skill pulls everything together and allows students to connect all concepts. Whether they are using sources or their own historical knowledge, students will use the historical reasoning processes to identify and explain patterns and connections between historical events and developments.

Skill	Tasks/Questions	Sample Activity	Instructional Strategies
5.A <i>Identify patterns among or connections between historical developments and processes.</i>	<ul style="list-style-type: none"> ▪ What historical developments or processes are described in this source? ▪ What are the causes of this development or process? ▪ What are the effects of this development or process? ▪ Where does the development or process fit into a pattern of continuity or change over time? ▪ What are the similarities and differences between this development or process and another? ▪ What does the data in a non-text-based source show? ▪ What trends and patterns can you identify from data? 	Have students examine a series of visual sources (such as Da Vinci's The Vitruvian Man, Albrecht Durer's Rhinoceros, Copernicus's heliocentric model of the universe, and Louis XIV Visiting the Royal Academy of Sciences) in order to identify and describe a pattern or connection between the Renaissance and the Scientific Revolution. They can also connect the source to the Partition of Poland, the Congress of Vienna, and German Unification using patterns of continuity and change over time.</p>	<ul style="list-style-type: none"> ▪ Quickwrite ▪ Self/Peer Revision

Historical Thinking Skill 6: Develop an argument

Writing claims is often the first argumentation skill that students practice, but claims are difficult to develop without prompting. Giving students prompts to work with can help them as they learn this skill. The prompt should establish parameters that require students to take a position, either by choosing one of two presented alternatives or by assessing the extent to which a given proposition or scenario is valid.

In order to develop a historically defensible claim, students need to know what evidence is available to support that claim. You can have students practice writing claims using just their knowledge as evidence, as they will in the long essay question. They should also write claims using documents, to practice both evidence and sourcing (a few at first, then build quantity as students gain skills and confidence), as they will in the document-based question.

The reasoning processes, discussed in more depth starting on page 231, will help students develop historical reasoning needed to appropriately connect their evidence to their claims.

There is no simple path to teaching students to develop complex arguments. The tasks/questions and the sample activities in the table below can serve as a roadmap. However, students will also need a mastery of the course content, source analysis, a highly developed understanding of historical context, and the ability to make connections between and among events to demonstrate this skill. In short, it is the culminating skill for an AP European History student.

Skill	Tasks/Questions	Sample Activity	Instructional Strategies

Then ask them to write a defensible claim that establishes a line of reasoning by stating their chosen position and provides a roadmap for how they are going to prove their claim ("because" statement).</p>	<ul style="list-style-type: none"> ▪ Self/Peer Revision

Developing the Reasoning Processes

Reasoning processes describe the cognitive operations that students will be required to apply when engaging with historical thinking skills on the AP Exam. The reasoning processes ultimately represent the way in which historians think.

Student responses on the AP Exam should reflect their ability to apply a reasoning process that aligns to the intent of the question. In many cases, guiding students

toward a better alignment between the reasoning process and the task unlocks their understanding and helps them improve their writing.

The table that follows provides suggestions for approaching the reasoning processes in the AP European History course.

Section I

PART A: MULTIPLE-CHOICE

The first part of Section I of the AP European History Exam includes 55 multiple-choice questions typically appearing in sets of three to four questions, each with one or more stimuli, including primary texts, secondary texts, images (artwork, photos, posters, cartoons, etc.), charts, or other quantitative data, and maps. Additionally, there will be at least one set of paired text-based stimuli. Multiple-choice questions require analysis of the provided stimulus sources and the historical developments and processes described in the sources.

PART B: SHORT-ANSWER

The second part of Section I of the AP Exam includes three required short-answer questions. Students must answer all three short-answer questions. Short-answer question 1 includes a secondary text source, short-answer question 2 includes a primary text source, and short-answer question 3 includes a primary or secondary non-text source. The three questions will cover historical developments and processes between the years of 1450 and 2001, and each of the questions will focus on a different historical period.

Section II

DOCUMENT-BASED QUESTION

The document-based question presents students with seven documents offering various perspectives on a historical development or process. The question requires students to do the following:

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
- Describe a broader historical context relevant to the prompt.
- Support an argument in response to the prompt using at least four documents.
- Use at least one additional piece of specific historical evidence (beyond that found in the documents) relevant to an argument about the prompt.
- For at least two documents, explain how or why the document's point of view, purpose, historical situation, and/or audience is relevant to an argument.
- Demonstrate a complex understanding of a historical development related to the prompt through sophisticated argumentation and/or effective use of evidence.

The topic of the document-based question will include historical developments or processes between the years 1450 and 2001.

LONG ESSAY QUESTION

The long essay question requires students to do the following:

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
- Describe a broader historical context relevant to the prompt.
- Support an argument in response to the prompt using at least two pieces of specific and relevant evidence.
- Use historical reasoning (e.g., comparison, causation, continuity or change over time) to frame or structure an argument that addresses the prompt.
- Demonstrate a complex understanding of a historical development related to the prompt through sophisticated argumentation and/or effective use of evidence.

The long essay question is required and covers approximately half of the chronological scope of the course. Students are not expected to address the entire time period in their response. Students may choose to focus on one (or more) historical development(s) referenced in the prompt.

How Student Learning Is Assessed on the AP Exam

The six historical thinking skills are assessed on the AP Exam as detailed below.

Historical Thinking Skill	Multiple-Choice Questions	Free-Response Questions
Skill 1: Developments and Processes	Multiple-choice questions assess students' ability to identify and explain historical developments and processes.	The short-answer questions, document-based question, and long essay question assess students' ability to identify and explain historical developments and processes.
Skill 2: Sourcing and Situation	Multiple-choice questions assess students' ability to analyze sourcing and situation of primary and secondary sources. Students will need to identify and explain the point of view, purpose, historical situation, and/or audience of a source, including its significance. Additionally, students will need to explain how the sourcing and situation might limit the use(s) of a source.	The short-answer questions assess students' ability to analyze the sourcing or situation in primary or secondary sources. The document-based question assesses students' ability to analyze how the point of view, purpose, historical situation, and/or audience is relevant to an argument.
Skill 3: Claims and Evidence in Sources	Multiple-choice questions assess students' ability to analyze arguments in primary and secondary sources, including identifying and describing claims and evidence used. Additionally, students will need to compare arguments and explain how claims or evidence support, modify, or refute a source's argument.	The short-answer questions assess students' ability to analyze arguments in primary and secondary sources. The document-based question also provides opportunities for students to analyze arguments in primary sources.
Skill 4: Contextualization	Multiple-choice questions assess students' ability to identify and describe a historical context for a specific historical development or process as well as explain how a specific development or process is situated within a broader historical context.	The document-based question and long essay question assess students' ability to describe a broader historical context relevant to the topic of the question. Short-answer questions may also assess this skill.
Skill 5: Making Connections	Multiple-choice questions assess students' ability to analyze patterns and connections between and among historical developments and processes, using historical reasoning processes (e.g., comparison, causation, continuity and change).	The document-based question, long essay question, and one or more of the short-answer questions all assess this skill.
Skill 6: Argumentation	No multiple-choice questions explicitly assess the argumentation skill.	The document-based question and long essay question assess argumentation.

Task Verbs Used in the Free-Response Questions

The following task verbs are commonly used in the free-response questions:

Compare: Provide a description or explanation of similarities and/or differences.

Describe: Provide the relevant characteristics of a specified topic.

Evaluate: Judge or determine the significance or importance of information or the quality or accuracy of a claim.

Explain: Provide information about how or why a relationship, process, pattern, position, situation, or outcome occurs, using evidence and/or reasoning. “Explain how” typically requires analyzing the relationship, process, pattern, position, situation, or outcome, whereas “explain why” typically requires analysis of motivations or reasons for the relationship, process, pattern, position, situation, or outcome.

Identify: Indicate or provide information about a specified topic, without elaboration or explanation.

Support an argument: Provide specific examples and explain how they support a claim.

Sample Exam Questions

The sample exam questions that follow illustrate the relationship between the course framework and the AP European History Exam and serve as examples of the types of questions that appear on the exam. After the sample questions is a table that shows to which skill and learning objective(s) each question relates. The table also provides the answers to the multiple-choice questions.

Section I

PART A: MULTIPLE-CHOICE

Questions 1–4 refer to the passage below.

“It is not right when some make the simple folk believe that diligent confession and a worldly gift grants a papal indulgence and that thereby they can attain the forgiveness of sins. For the clink of the coin that falls into the money box will not free the sinner of his sins. Forgiveness requires first and above all else a truly contrite heart. Also, it is beyond doubt that the person may attain forgiveness of his sins by a true, honest contrition even without all the indulgences that he can avail himself of. But it is incredible and without any basis to attain pardon of sins even with papal grace if there is not first a true, heartfelt contrition over sins. . . . It is also the greatest foolishness to think sins may be greater than God’s mercy. The mercy of God is without measure and infinitely great. No one who seeks it will be denied it.”

Johannes von Staupitz, Catholic theologian and dean of the faculty at the University of Wittenberg, sermon, 1516

1. Which of the following best describes the main claim made by von Staupitz in the passage?

 - (D) Bishops, rather than the pope, should have the power to forgive sins.
2. The passage best reflects which of the following developments of the early sixteenth century?
 - (A) The rejection of Protestant ideas by members of the Catholic hierarchy
 - (B) The beginning of Europeans’ self-identification with national and ethnic groups
 - (C) The questioning of established Catholic Church doctrine
 - (D) The attempt to restrict access to new ideas made available by the printing press

3. Based on the passage and the historical context in which it was published, which of the following would most likely have challenged the author's assertions?
- (A) Protestant reformers, such as Martin Luther
 - (B) Catholic authorities, such as the pope

 - The Antwerp stonemasons' guild was unusually powerful and was frequently able to bargain successfully for higher wages.
 - Wages and prices increased significantly more in the sixteenth century than they had in the previous century.

Questions 8–11 refer to the passage below.

“Foreign trade can bring great wealth, but it also exposes us to great risks. The domestic economy of a state is its real treasure. For Spain, foreign trade has become a great chain binding us to vast overseas territories. Rather than worry daily about their preservation, we must pay greater attention to those certain sources of wealth in our domestic economy. We lost Flanders, we lost Italy, so why could we not lose Mexico and Peru? Little Prussia has given the world a surprising example of what a medium-sized kingdom can do on its own. . . .

It is necessary to inform the people of the motives for a law, and of the evils the law seeks to avoid or the benefits it seeks to provide. This is especially true in monarchies in which the people have no part of legislative authority. The true measure of good laws is the extent to which they apply equally to all citizens. Happy is the kingdom whose ruler is governed by the maxims of justice and who can balance sovereign authority with civil liberty. Happy the king who realizes that political oppression is bad for the longevity of the state and that mutual confidence and unity between citizens cannot be established if the relationship between rulers and the ruled is akin to that between masters and slaves.”

 - (D) They convinced Spaniards that their country needed to overthrow its monarchy and establish a republican government.

Questions 12–14 refer to the passage below.

“The single and undisguised object of the League is to put down commercial monopoly; but that cannot be done by saddling upon our backs a fixed duty [tax] on imported corn [grain], which means a differential duty on sugar, on coffee, and monopoly in every other article. The Corn-law is the great tree of Monopoly, under whose baneful shadow every other restriction exists.

It is no fault of ours if with this agitation should be mixed up with the question of rents [paid by tenant farmers to large landowners], and should mingle in a degree that would render it difficult to separate the rights of property from the claims of those who labour under the grievance of these intolerable exactions. It is no fault of ours if the nobility of this country should become as much detested at their own baronial hall doors as were the noblesse of France previous to the Revolution. We are responsible for none of these things. The fault lies with those who support monopoly, who are deaf to reason and justice, and who place themselves upon a pedestal of injustice; a pedestal which is always liable to fall, and always certain to bring down those who stand upon it.

Free Trade! What is it? Why, breaking down the barriers that separate nations; those barriers, behind which nestle the feelings of pride, revenge, hatred, and jealousy, which every now and then burst their bounds, and deluge whole countries with blood; those feelings which nourish the poison of war and conquest, which assert that without conquest we can have no trade, which foster that lust for conquest and dominion which sends forth your warrior chiefs to scatter devastation through other lands, and then calls them back only to harass and oppress you at home.”

 - (C) Mercantilist economic policies were widely supported by the British working class.

 - (C) The increasing incidence of famine due to decreased food production in Great Britain
 - (D) The rising desire for national self-determination among ethnic minorities

“I have a family of nine, and what did I have before the kolkhoz [collective farm]? I had all the produce I needed to feed my family, and fuel, and I clothed and shod them. Had a horse and three head of sheep. Delivered to the government twenty poods [1 pood = about 36 pounds] of rye, forty poods of millet, oats, potatoes, and hemp. I have worked on the kolkhoz, I have honestly earned 355 labor-days, but I no longer eat bread, but husks and potatoes, we don’t have enough to resole our shoes. My children have turned black from malnutrition. Respected editors, is there no way to leave the kolkhoz rather than perish here?”

Document 1

Source: Holy Roman Emperor Matthias, open letter to his Protestant subjects in Bohemia, 1618

It has been alleged that the free exercise of religion will be abolished. We want to make it clear to you through this open letter that we have no intention of rescinding the agreement between the religions, still less want anyone else to do this, despite what others in Bohemia may have said. Moreover, we have always intended, and still intend, to preserve all the Bohemian privileges, liberties, and treaties. Anyone who claims otherwise slanders us before God and the world. Rest assured, dear obedient, loyal, and true Bohemian subjects, and do not give credence to such falsehoods. We would like nothing more than to return in person to our royal throne and residence amongst our loyal and obedient subjects and inhabitants and clear up these misunderstandings with God's help. However, we cannot come to our Bohemian territories at the moment, partly through poor health, but also pressure of other important affairs. Capable and prominent individuals will be appointed to clear up this misunderstanding. Since no enemy threatens us as ruler of Bohemia, there are no constitutional grounds to raise soldiers to defend the country, and thus no grounds for anyone, whoever, they might be, to use the territorial privileges, letters of majesty, ordinances, freedoms, or laws to justify arming.

Document 2

Source: Selections from the constitution of the Bohemian Federation, a coalition of nobles and city governments, 1619

Since the Almighty has also given his grace and blessing as this Confederation is solely in defense of religion, the territories have agreed that each and every one of their coreligionists should follow a Christian life according to the Calvinist teaching and faith, avoid and prevent sin, vice, public trouble, hypocrisy, in whatever form, and follow strictly the admonishments from the pulpit and the authorities. . . .

All churches in these united territories currently in Calvinist hands are to remain so in perpetuity. . . .

The free exercise of Calvinist religion is extended to every man and woman in all united territories and towns regardless as to whether they belong to the king or queen, permitting the construction of churches, schools, and cemeteries, and the appointment of Calvinist pastors and schoolteachers. Everyone shall be allowed to follow the old ceremonies of their Christian conscience in their own church. However, to ensure better unity and to prevent all kinds of difficulties and bitterness, there are to be no insults or personal attacks from the pulpit upon pain of removal from office. . . .

Should, contrary to hope, a king attempt anything contravening the religious concessions, unions, and this constitution, and thereby force the territories to take defensive measures, then all of these united kingdoms and provinces are released from their duty and cannot be subsequently held to account for any insults to the royal sovereignty and majesty.

Source: Bernhard Baumann, Jesuit official in Heidelberg, report to Elector Maximilian of Bavaria on efforts to re-Catholicize previously Protestant areas after the Catholic victory in that region, 1628

Four hundred in the town and 1,200 outside it have been freed from heresy; on feast days we get around 700 communicants in the Church of the Holy Spirit. We alone look after parish duties, visit the sick and converts daily, conduct catechism inside the town and outside, and deliver two sermons on Sundays. These crowds are gathered with great difficulty; since only six months ago the richer townspeople were so obstinate, that two or three hundred declared they would emigrate if they were forced to convert. Then entire districts (they had arranged this in advance) declared they would keep the faith of their ancestors, because we could not steal this like other possessions. Since the orders arrived from Munich [to intensify Catholic conversions] they have used unbelievable deceptions to try to circumvent these. Furthermore, they complain to the Holy Roman Emperor, but the secular government, to its undying credit, knew how to stop this.

I have come into this land for no other purpose than to free it from the thieves and robbers who have so plagued it, and, first and foremost, to help his Excellency [the elector] out of his difficulties. Does his Excellency then not know that the [Holy Roman] emperor and his followers do not mean to rest till the Protestant religion is wholly rooted out of the empire, and that his Excellency has nothing else to expect than being forced either to deny his religion or to leave his country? Does he think by prayers and pleas and such like means to obtain something different? . . . I seek not my own advantage in this war, nor any gain save the security of my kingdom; I can look for nothing but expense, hard work, trouble, and danger to life and limb.

I tell you plainly that I will know nor hear nothing of “neutrality”; his Excellency must be either friend or foe. When I reach his frontier he must declare himself either hot or cold. The fight is between God and the devil. If his Excellency is on God’s side, let him stand by me; if he holds rather with the devil, then he must fight with me; there is no third course, that is certain.

Concerning the late Gustavus Adolphus’ intentions:

They were, in general, to disrupt the plans of the enemy, whose intentions with regards to the Baltic Sea are sufficiently well-known. His Majesty therefore intended to ensure the safety of his kingdom and the Baltic region, and liberate the oppressed lands [of Germany]; and thereafter to proceed according as events might develop: it was no part of his original intention to march as far into Germany as he did. He saw and clearly understood where that would lead, but the enemy and the circumstances compelled this. His majesty was there in person wherever the greatest danger was.

Source: Pope Innocent X, papal declaration in response to the treaty of Westphalia, 1648

Consumed by zeal for the house of the Lord, we endeavor everywhere to maintain the integrity and the authority of the Catholic Church, so that the ecclesiastical rights of which we have been appointed guardian by our Savior shall not in any way be impaired by those who seek their own interest rather than God's, and that we may not be accused of negligence when we shall render account to God. Accordingly it is not without deep pain that we have learned that by several articles in the peace concluded at [Westphalia], between our very dear son in Christ, Ferdinand, king of the Romans and emperor elect, on the one hand, and the Swedes, as well as our very dear son in Jesus Christ, Louis, the very Christian king of the French, on the other, great prejudice has been done to the Catholic religion, the divine service, the Roman apostolic see, the ecclesiastical order, their jurisdictions, authority, immunities, liberties, exemptions, privileges, possessions, and rights. . .

Accordingly we assert and declare that all the articles in the treaty which in any way impair . . . the Catholic religion, divine worship, or the salvation of souls . . . have been, and are of right, and shall perpetually be, null and void . . . even when they be ratified by oath.

LONG ESSAY QUESTION

The following is an example of a long essay question.

Your response may focus on any political revolution(s) that occurred during the period 1650 to 2001. You are not expected to address the entire time period in your response.

In your response you should do the following:

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
- Describe a broader historical context relevant to the prompt.
- Support an argument in response to the prompt using at least two pieces of specific and relevant evidence.
- Use historical reasoning (e.g., comparison, causation, continuity or change) to frame or structure an argument that addresses the prompt.
- Demonstrate a complex understanding of a historical development related to the prompt through sophisticated argumentation and/or effective use of evidence.

You are not expected to address the entire time period in your response. You may choose to focus on one (or more) historical development(s) referenced in the prompt.

AP History Rubrics

Introductory notes:

- Except where otherwise noted, each point of the rubric is earned independently. For instance, a student could earn a point for evidence beyond the documents without earning a point for thesis/claim.
- Accuracy: The components of this rubric each require that students demonstrate historically defensible content knowledge. Given the timed nature of the exam, a response may contain errors that do not detract from its overall quality, as long as the historical content used to advance the argument is accurate.
- Clarity: Exam essays should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and reasoning processes described in the rubrics.

Given the timed nature of the exam, responses may contain errors that do not detract from their overall quality, as long as the historical content used to advance the argument is accurate.
- **Clarity:** Exam responses should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and reasoning processes described below.

Document 1

Source: Holy Roman Emperor Matthias, open letter to his Protestant subjects in Bohemia, 1618

It has been alleged that the free exercise of religion will be abolished. We want to make it clear to you through this open letter that we have no intention of rescinding the agreement between the religions, still less want anyone else to do this, despite what others in Bohemia may have said. Moreover, we have always intended, and still intend, to preserve all the Bohemian privileges, liberties, and treaties. Anyone who claims otherwise slanders us before God and the world. Rest assured, dear obedient, loyal, and true Bohemian subjects, and do not give credence to such falsehoods. We would like nothing more than to return in person to our royal throne and residence amongst our loyal and obedient subjects and inhabitants and clear up these misunderstandings with God's help. However, we cannot come to our Bohemian territories at the moment, partly through poor health, but also pressure of other important affairs. Capable and prominent individuals will be appointed to clear up this misunderstanding. Since no enemy threatens us as ruler of Bohemia, there are no constitutional grounds to raise soldiers to defend the country, and thus no grounds for anyone, whoever, they might be, to use the territorial privileges, letters of majesty, ordinances, freedoms, or laws to justify arming.

Document 2

Source: Selections from the constitution of the Bohemian Federation, a coalition of nobles and city governments, 1619

Since the Almighty has also given his grace and blessing as this Confederation is solely in defense of religion, the territories have agreed that each and every one of their coreligionists should follow a Christian life according to the Calvinist teaching and faith, avoid and prevent sin, vice, public trouble, hypocrisy, in whatever form, and follow strictly the admonishments from the pulpit and the authorities. . . .

All churches in these united territories currently in Calvinist hands are to remain so in perpetuity. . . .

The free exercise of Calvinist religion is extended to every man and woman in all united territories and towns regardless as to whether they belong to the king or queen, permitting the construction of churches, schools, and cemeteries, and the appointment of Calvinist pastors and schoolteachers. Everyone shall be allowed to follow the old ceremonies of their Christian conscience in their own church. However, to ensure better unity and to prevent all kinds of difficulties and bitterness, there are to be no insults or personal attacks from the pulpit upon pain of removal from office. . . .

Should, contrary to hope, a king attempt anything contravening the religious concessions, unions, and this constitution, and thereby force the territories to take defensive measures, then all of these united kingdoms and provinces are released from their duty and cannot be subsequently held to account for any insults to the royal sovereignty and majesty.

	<p>Demonstrating complex understanding might include any of the following, if appropriate elaboration is provided:</p> <ul style="list-style-type: none"> Exploring multiple themes, such as European leaders' willingness to use religious and political rationales to increase the power of the state. <i>(Explains nuance)</i> Explaining that the Thirty Years' war had both religious and political reasons, but making a clear chronological demarcation between the two, arguing that the motivations for the war shifted from religious to political following the French entry into the war. <i>(Explains multiple causes or effects)</i> Connecting to other time periods, such as contrasting Richelieu's treatment of Protestants in France with the ways that Philip used the Spanish Inquisition's to force the exodus of Spanish Jews who did not convert to Christianity. <i>(Explains relevant and insightful connections)</i> Acknowledging that Cardinal Richelieu in Document 6 is achieving political gains and using religion as an excuse. As a politique he is willing to disregard his religious beliefs in favor of the state. He is killing two birds with one stone by removing Huguenots and increasing unity in France. Along with Adolphus, these leaders are extending the security of their states and increasing their power. This demonstrates how a ruler can use religious and political motivations to achieve their goal of increasing the power of the state, and therefore an understanding of broader historical developments behind the document. <i>(Explains nuance)</i> Discussing both religious and political reasons but making a clear chronological demarcation between the two. The transition is based on the intervention of France and Sweden into the conflict. The response uses Document 1 (Emperor is trying to comfort and pacify the agitation) and Document 2 (Bohemia's response ...defending its right to practice Calvinism). A discussion of religious reasons is followed by an analysis of Documents 4, 5, and 6 discussing Adolphus and France's intervention into the war. This develops the argument that the aims of Sweden and France changed the complexity of the war from religiously to politically motivated actions. <i>(Explains nuance through multiple variables)</i> Establishing the argument that the true purpose of the Thirty Years' War was the gain of power. Document 1 is used to explain how Matthias tries to avoid alienating Protestants by allowing the free practice of religion, but in reality this is a façade to protect his own power by deterring the Bohemians from taking up arms. The response then corroborates this line of reasoning by suggesting that the coalition of Calvinist nobles and cities is deceptive in that its actual motivation is political rather than being based on religious freedom. This confirms the validity of the argument by showing the use of religion as a pretext for political motives from the differing perspective of a Catholic and a Protestant ruler. <i>(Corroborates an argument by considering diverse or alternative views or evidence)</i> Supporting an argument that the Thirty Years' War can be connected to the Spanish Inquisition, the response uses Document 6 to contrast the relatively placid way that Richelieu removed Protestants from France with the violent way in which Philip forced the exodus of Spanish Jews who would not convert. The response continues by noting that Richelieu's approach is less violent than the treatment Huguenots could expect in Spain or Austria. <i>(Explains relevant and insightful connections)</i> <p>Additional Notes:</p> <ul style="list-style-type: none"> This complex understanding must be part of the argument and may be demonstrated in any part of the response. While it is not necessary for this complex understanding to be woven throughout the response, it must be more than merely a phrase or reference. To earn a point for complexity by using seven documents in support of an argument, there must be an attempt to use all seven documents to effectively support an argument, but the use of the documents may be unevenly or inconsistently developed, or the document use may be weaker in one or two instances.

Long Essay Question

2. During the period 1650 to 2001, European individuals and movements challenged political and economic structures as well as social hierarchies, often through revolution.

Evaluate the extent to which political revolutions transformed Europe during the period 1650 to 2001.

Your response may focus on any political revolution(s) that occurred during the period 1650 to 2001. You are not expected to address the entire time period in your response.

In your response you should do the following:

- Respond to the prompt with a historically defensible thesis or claim that establishes a line of reasoning.
- Describe a broader historical context relevant to the prompt.
- Support an argument in response to the prompt using at least two pieces of specific and relevant evidence.
- Use historical reasoning (e.g., comparison, causation, continuity or change) to frame or structure an argument that addresses the prompt.
- Demonstrate a complex understanding of a historical development related to the prompt through sophisticated argumentation and/or effective use of evidence.

You are not expected to address the entire time period in your response. You may choose to focus on one (or more) historical development(s) referenced in the prompt.

General Scoring Notes

- Except where otherwise noted, each point of these rubrics is earned independently; for example, a student could earn a point for evidence without earning a point for thesis/claim.
- **Accuracy:** The components of these rubrics require that students demonstrate historically defensible content knowledge. Given the timed nature of the exam, essays may contain errors that do not detract from their overall quality, as long as the historical content used to advance the argument is accurate.
- **Clarity:** Exam essays should be considered first drafts and thus may contain grammatical errors. Those errors will not be counted against a student unless they obscure the successful demonstration of the content knowledge, skills, and practices described below.
