Sustained Investigation

Row B–Score 1

Written Evidence

Writing Prompt #1:

Identify the question(s) or inquiry that guided your sustained investigation.

Writing Prompt #2:

Describe how your sustained investigation shows evidence of practice, experimentation, and revision guided by your question(s) or inquiry.

Student Response

Things that have guided me through this investigation is working with different materials. From graphite, to water color, acrylic paint, wash, and photography. Working with them gives me more freedom to create paintings and pictures that will be what I want to see in my portfolio, also what other may want to see in it. Knowing that art is so broad that creating it can be anything and doesn't need to look the same.

Getting the right angles and perspectives. Going out and getting different pictures with different colors, shades, and lighting. Using the outside world as examples of art. In my sky pictures you can see the use of different light values. Pictures taken in Los Angeles have more focused on color values and one point perspectives. Drawings contain different types of paints and charcoal.

Sustained Investigation: Analytic Scoring Rubric and Score Rationale

Row B–Score 1

Analytic Scoring Rubric Row B: Practice, Experimentation, and Revision Writing Prompt 2: <i>Describe how your sustained investigation shows evidence of practice, experimentation, and revision guided by your question(s) or inquiry.</i>		
1	2	3
Visual evidence of practice, experimentation, OR revision; however, visual evidence does not relate to a sustained investigation.	Visual evidence of practice, experimentation, OR revision relates to the sustained investigation. AND Written evidence relates to the visual evidence of practice, experimentation, OR revision.	Visual evidence of practice, experimentation, AND revision demonstrates development of the sustained investigation. AND Written evidence describes how the sustained investigation shows evidence of practice, experimentation, OR revision.

Score Rationale

This portfolio has written evidence of practice, “going out and getting different pictures with different colors, shades, and lighting.” However, visual evidence does not support the statement. In image 2, there is little investigation of colors, shading, and lighting, as can be seen with the simple application of paint in the flowers. Although the written evidence in image 9 mentions that the photograph's setting is at a Japanese restaurant with an emphasis on the different colors and shade values, the image contains little color and has limited values. Furthermore, in image 12, there was an “Emphasis on a different number of things,” which lacks the specificity of the design idea and does not connect to the sustained investigation. Overall, the visual evidence of practice, experimentation, or revision does not relate to a sustained investigation and could use more development.
