Individual Research Report (IRR)**30 points****General Scoring Notes**

- When applying the rubric for each individual row, you should award the score for that row based solely upon the criteria indicated for that row, according to the preponderance of evidence.
- Read the whole report before assigning a score for any row.
- Reward the student for skills they have demonstrated. Demonstrating means that there is evidence that you can point to in the report.

0 (Zero) Scores

- A score of 0 is assigned to a single row of the rubric when the response displays a below-minimum level of quality as identified in that row of the rubric. For rows 1 to 4, if there is no evidence of any research (i.e., it is all opinion and there is nothing in the bibliography, no citation or attributed phrases in the response) then a score of 0 should be assigned.
- Scores of 0 are assigned to all rows of the rubric when the response is off-topic; a repetition of a prompt; entirely crossed-out; a drawing or other markings; a presentation (or other off-task format); or a response in a language other than English.

NR (No Response)

A score of NR is assigned to responses that are blank.

Reporting Category	Scoring Criteria			
Row 1 Understand and Analyze Context (0, 2, 4 or 6 points)	0 points Does not meet the criteria for two points.	2 points The report identifies an overly broad or simplistic area of investigation and/or shows little evidence of research. A simplistic connection or no connection is made to the overall problem or issue.	4 points The report identifies an adequately focused area of investigation in the research and shows some variety in source selection. It makes some reference to the overall problem or issue.	6 points The report situates the student’s investigation of the complexities of a problem or issue in research that draws upon a wide variety of appropriate sources. It makes clear the significance to a larger context.
	Decision Rules and Scoring Notes			
	Typical responses that earn 0 points: <ul style="list-style-type: none"> Provide no evidence of research (i.e., there is a complete absence of bibliography, internal citations, and attributive tags that point to research. If one of these is present, cannot score 0). 	Typical responses that earn 2 points: <ul style="list-style-type: none"> Address a very general topic of investigation (e.g. “pollution”). Draw mainly from one or two sources or poor-quality sources. Provide an overly simplistic, illogical, or exaggerated rationale for the investigation (or does not provide a rationale at all). 	Typical responses that earn 4 points: <ul style="list-style-type: none"> Identify too many aspects of the topic to address complexity (e.g. “air, water, and land pollution”). May be overly reliant on research sources not appropriate for an academic task on this topic. May provide a rationale about the significance of the investigation that lacks details necessary to address complexity. 	Typical responses that earn 6 points: <ul style="list-style-type: none"> Clearly state an area of investigation that is narrow enough to address the complexity of the problem or issue (e.g. “water pollution in India”). The context established is sustained throughout. Predominantly include research sources appropriate for an academic task on this topic. Provide specific and relevant details to convey why the problem or issue matters/is important.
Additional Notes <ul style="list-style-type: none"> The research context is located often in the titles of the reports and first paragraphs, but the whole report needs to sustain the focus throughout. Review Bibliography or Works Cited (but also check that context is established by sources actually used, especially academic sources). 				

Reporting Category	Scoring Criteria			
<p>Row 2</p> <p>Understand and Analyze Argument</p> <p>(0, 2, 4 or 6 points)</p>	<p>0 points</p> <p>Does not meet the criteria for two points.</p>	<p>2 points</p> <p>The report restates or misstates information from sources. It doesn't address reasoning in the sources or it does so in a very simplistic way.</p>	<p>4 points</p> <p>The report summarizes information and in places offers effective explanation of the reasoning within the sources' argument (but does so inconsistently).</p>	<p>6 points</p> <p>The report demonstrates an understanding of the reasoning and validity of the sources' arguments.* This can be evidenced by direct explanation or through purposeful use of the reasoning and conclusions.</p>
	Decision Rules and Scoring Notes			
	<p>Typical responses that earn 0 points:</p> <ul style="list-style-type: none"> Provide no evidence of research (i.e., there is a complete absence of bibliography, internal citations, and attributive tags that point to research. If one of these is present, cannot score 0). 	<p>Typical responses that earn 2 points:</p> <ul style="list-style-type: none"> Make no distinction between paraphrased material and response's commentary. Demonstrate no instances of effective explanation. (For example, commentary is limited to restatement of quotes, is simplistic or overgeneralized, or shows misunderstanding of the source.) Do not anchor ideas to sources (or does so generally, "research shows" or "some studies"). 	<p>Typical responses that earn 4 points:</p> <ul style="list-style-type: none"> Are dominated by summary of source material rather than explanation of sources' arguments. Provide some instances of effective explanation of authors' reasoning. Occasionally lack clarity about what is commentary and what is from the source material. 	<p>Typical responses that earn 6 points:</p> <ul style="list-style-type: none"> Provide commentary that explains authors' reasoning, claims or conclusions (direct explanation). Make effective use of authors' reasoning, claims or conclusions (showing understanding of the sources) (purposeful use). Attribute clearly source material (i.e., readers always able to tell what comes from what source).
<p>Additional Notes</p> <ul style="list-style-type: none"> * Validity is defined as "the extent to which an argument or claim is logical." Reference to arguments from the sources used often appears at the end of paragraphs and / or immediately following an in-text citation as part of the commentary on a source. Clear attribution, (i.e. readers are always able to tell what comes from what source and what kind of source it is) must be present in order for the report to demonstrate "purposeful use." 				

Reporting Category	Scoring Criteria			
<p>Row 3</p> <p>Evaluate Sources and Evidence</p> <p>(0, 2, 4 or 6 points)</p>	<p>0 points</p> <p>Does not meet the criteria for two points.</p>	<p>2 points</p> <p>The report identifies evidence from chosen sources. It makes very simplistic, illogical, or no reference to the credibility of sources and evidence, and their relevance to the inquiry.</p>	<p>4 points</p> <p>The report in places offers some effective explanation of the chosen sources and evidence in terms of their credibility and relevance to the inquiry (but does so inconsistently).</p>	<p>6 points</p> <p>The report demonstrates evaluation of credibility of the sources and selection of relevant evidence from the sources. Both can be evidenced by direct explanation or through purposeful use.</p>
	Decision Rules and Scoring Notes			
	<p>Typical responses that earn 0 points:</p> <ul style="list-style-type: none"> Provide no evidence of research (i.e., there is a complete absence of bibliography, internal citations, and attributive tags that point to research. If one of these is present, cannot score 0). 	<p>Typical responses that earn 2 points:</p> <ul style="list-style-type: none"> Provide evidence that is poorly selected in terms of relevance and credibility (e.g., evidence that is irrelevant or only obliquely relevant). Provide evidence without addressing relevance and credibility. Demonstrate consistent lack of understanding of selected evidence. May include credible sources, but oversimplify or reduce them to generalities. 	<p>Typical responses that earn 4 points:</p> <ul style="list-style-type: none"> Contain attributions or explanations for non-academic sources that do not successfully establish credibility (e.g., “John Doe, a journalist, explains…”). Pay attention to the evidence, but not the source (may treat all evidence as equal when it is not). At times may demonstrate lack of understanding of selected evidence and/or its relevance. Draw upon outdated research without providing a rationale for using that older evidence. 	<p>Typical responses that earn 6 points:</p> <ul style="list-style-type: none"> Provide descriptions in the attributions that effectively establish credibility of the source and relevance of evidence (direct explanation). Make effective use of well-chosen, relevant evidence from credible academic sources (purposeful use).
<p>Additional Notes</p> <ul style="list-style-type: none"> In Row 1, the judgement is whether the bibliography allows for complex context; Row 3 judges whether the incremental examples of evidence presented are well-selected and well-used. Purposeful use, in this case, refers to the deployment of relevant evidence from a credible source. Clear attribution, (i.e. readers are always able to tell what comes from what source and what kind of source it is) must be present in order for the report to demonstrate “purposeful use.”

General Scoring Notes

- Do not repeatedly rewind or re-listen to recorded presentations.
- There is a time limit. **Only the first 10 minutes** of any presentation are scored (excluding the oral defense).
- The defense is scored only after the presentation proper is scored. The defense does not impact the scores in Rows 1-4.
