CREATE THE FUTURE

AP Computer Science Principles

The Power of Computer Science

THE INNOVATION ENGINE
From 3-D animation to medicine, fashion, engineering, visual design, finance, music production, statistical analysis, and much more, computer science powers the technology, productivity, and innovation that drives the world.

IDEAS COME TO LIFE
AP Computer Science Principles (AP CSP) helps you understand how computing and technology influence the world around you. In this course, you’ll create digital projects, such as games and apps, to address real-world issues in the same way writers, programmers, engineers, and designers do. The only recommended prerequisite for taking the course is completion of Algebra 1.

PROJECTS CREATED BY AP CSP STUDENTS:
- An app that helps travelers pack based on their destination’s weather
- A program that identifies cybersecurity threats and indicates how to use the internet to address them
- An LED light show

“AP Computer Science Principles opened my mind to just about everything. I learned that computer science and programming is not just for some people—it’s for anybody.”
—Mikiyah Smith, Sophomore

Beyond Computing

AP CSP prepares you for success not only in computer science majors and careers but also in other fields. For example, computer science skills can help you:

1. Create apps to track health data and provide real-time suggestions for ways to live healthier.
2. Program models and experiments that help answer biology, physics, and sociology questions.
3. Design and build robots for use in fields like manufacturing, surgery, research, and transportation.
4. Create a website to raise awareness for causes you care about.

Why CSP?

Students who’ve taken AP CSP say that it:
- Prepares them for many different jobs.
- Enables them to apply computer science to disciplines that interest them.
- Gives them an opportunity to work on problem solving with classmates.

Ask a school counselor or AP coordinator if AP Computer Science Principles is offered at your school and how to enroll.
