College Board

College Board is a mission-driven not-for-profit organization that connects students to college success and opportunity. Founded in 1900, College Board was created to expand access to higher education. Today, the membership association is made up of over 6,000 of the world's leading educational institutions and is dedicated to promoting excellence and equity in education. Each year, College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success—including the SAT® and the Advanced Placement® Program. The organization also serves the education community through research and advocacy on behalf of students, educators, and schools. For further information, visit [collgeboard.org](http://collegeboard.org).

**AP® Equity and Access Policy Statement**

College Board strongly encourages educators to make equitable access a guiding principle for their AP programs by giving all willing and academically prepared students the opportunity to participate in AP. We encourage the elimination of barriers that restrict access to AP® for students from ethnic, racial, and socioeconomic groups that have been traditionally underrepresented. Schools should make every effort to ensure their AP classes reflect the diversity of their student population. College Board also believes that all students should have access to academically challenging coursework before they enroll in AP classes, which can prepare them for AP success. It is only through a commitment to equitable preparation and access that true equity and excellence can be achieved.

**WE**

WE is a movement that empowers people to change the world through a charitable foundation and a social enterprise. Our service learning program, WE Schools, supports teachers’ efforts to help students become compassionate leaders and active citizens, empowering them to take action on the issues that matter most to them. Currently partnered with 18,400 schools and groups, and backed by a movement of 5.3 million youth, we are engaging a new generation of service leaders and providing resources for a growing network of educators.

Our free and comprehensive library of lesson plans is designed to be adapted to meet the needs of any partner school, regardless of students’ grades, socioeconomic backgrounds, or learning challenges. Skills development through the program also increases academic engagement and improves college and workplace readiness. Third-party impact studies show that alumni of the program are more likely to vote, volunteer, and be socially engaged. Learn more at [WE.org](http://WE.org).

**About the Partnership**

College Board and WE share a passion for enriching students’ learning experiences and developing well-rounded citizens. By combining the academic challenge and rigor of AP® with WE’s Learning Framework, AP® with WE Service creates an opportunity for students to consider their classroom work and how it applies to real-world issues, while working closely with their peers to address relevant needs in their local and global communities.

Using This Module

AP® with WE Service provides a collection of resources to support your planning and implementation of the program. This teaching module, Access to Clean Water, is one of two sample lesson guides for AP® Environmental Science. As you read through this module, refer to the AP® with WE Service Program Guide for additional activities that will support your students’ learning throughout the program.

Program Guide

The AP® with WE Service Program Guide contains a robust collection of service oriented activities and resources that support the WE Learning Framework. Use these case studies, news articles, and student activities to supplement and strengthen your students’ understanding and application of core service learning skills. 

WE Resources

WE offers a library of resources to support you in delivering content on social topics and issues, as well as the tools and the inspiration for your students to take social action, empower others, and transform lives—including their own. Access our resources at WE.org/weschoolsresources. An AP® with WE Service Program Manager will support you in planning your instruction with access to the resources that are the right fit for you. Digital Social Issues Sessions will connect your students with a motivational speaker or facilitator to deliver an online workshop on global and local issues and topics. Speakers and facilitators can also be booked for school-wide speeches and smaller group or class workshops on site. Full-day Youth Summits provide immersive issues education and action planning opportunities for students. Throughout the module, you will also see tables of optional activities and resources you can pull into your instruction.

Digital Portfolio

Report your students’ performance through the AP® with WE Service digital portfolio. Step-by-step directions for using the digital portfolio are available on the program website: collegeboard.org/apwe-resources.

How-To Videos

Also available on the program website are how-to videos that explain what AP® with WE Service is all about, as well as the steps you need to take to get it going in your class: collegeboard.org/apwe-videos.
Module Sections

THE PLAN SECTION contains information to help you decide how and when you will fit this module into your AP® curriculum.

PART 1: INVESTIGATE AND LEARN defines and explores the module topic at local and global levels, and within the context of your AP® course curriculum. This will be the majority of your required in-class instruction hours and it is where your students will start to make connections between your AP® course content and the module topic.

PART 2: ACTION PLAN guides students as they form teams and begin developing their plan for achieving one local and one global action.

PART 3: TAKE ACTION is where students put their plans into action. As they work, they should keep track of what they do and collect artifacts that capture their efforts. During this part, you may need to guide students as they encounter obstacles or help them maintain their motivation.

PART 4: REPORT AND CELEBRATE describes how students can showcase their projects and share their accomplishments. Presentations and celebrations may be in your class or in the community.
Teaching Module

Access to Clean Water

“Water is critical for sustainable development, including environmental integrity and the eradication of poverty and hunger, and is indispensable for human health and well-being.”

— PREAMBLE TO UN RESOLUTION ON THE INTERNATIONAL DECADE FOR ACTION, “WATER FOR LIFE,” 2005–2015
Getting to Know the Topic

Access to Clean Water: Globally

In 2010, the UN declared access to clean water to be a universal human right. There are more than 780 million people who live without access to clean water. And without access to sanitation facilities, diseases like cholera, typhoid, and dysentery spread quickly.

Many students—most often girls—miss school due to illness, or because they spend their days hauling water from distant sources rather than attending class. When drought strikes, farms fail and entire villages can go hungry. In times like these, access to clean water can mean the difference between life and death.

Fast facts

- In many developing countries, up to 70% of industrial waste materials are disposed of in untreated water, making the water supply polluted.
- Almost 900 children die every day from diarrhoeal diseases caused by unsafe water and poor sanitation.
- Approximately 70% of water taken from rivers, lakes, and aquifers is used for farming and irrigation.

Taking Action Globally

There are a number of ways that students can take action in their own school and community to improve access to clean water in developing communities around the world. Some ideas include:

- Volunteer at an organization that works with global issues—many organizations offer ways to get involved on their websites and in their offices
- Collect supplies (in consultation with the organization) or raise funds for an organization that will share the outcomes of the donations
- Create a letter writing campaign to the United Nations, government bodies, and other leaders to ask for added resources on the issue

Another option is to support and fundraise for the WE Villages program. Students can support this program by visiting [WE.org/we-schools/program/campaigns](WE.org/we-schools/program/campaigns) to get ideas and resources for taking action on global water issues.

More than 840 million people do not have a basic drinking water service.
Getting to Know the Topic

Access to Clean Water: Locally

Water scarcity and water sustainability issues affect millions of Americans. There is a water crisis in the U.S. southwest, where water regulators have mandated conservation and enforced restrictions on how individuals, farms, and businesses can use water due to regularly reoccurring drought conditions.

Low rainfalls mean that above-ground lakes are falling to low levels and even drying up. One resource that is affected is the Colorado River Basin, which is essential to the daily lives of people in urban and rural areas, as well as for agriculture and economies in seven states: Arizona, California, Colorado, New Mexico, Nevada, Utah, and Wyoming. With the continuing drought, these states are in danger of exhausting their groundwater reserves which, once depleted, cannot be replenished.

Fast facts

- This river supplies water to 40 million people and irrigates 4 million acres of farmland in 7 U.S. states.
- In California, farms account for 80% of water use (cities are 20%).

Taking Action Locally

Within their local or national community, students can:

- Work with a local organization addressing the topic
- Collect goods and items that support the needs of organizations and their local beneficiaries (e.g., non-perishable items for food banks, warm clothes and personal hygiene products for the local homeless shelter, etc.)
- Create and deliver an educational workshop to raise awareness about the topic and its local impact with a strong call to action that leads to enacting change

With both their global and local actions, encourage students to be creative with the ideas they develop through their action plans.

40 Out of 50 states, have at least one region that is expected to face some kind of water shortage in the next 10 years.
Taking Action

Global and Local Service Projects

WE Villages
For more than two decades, WE Villages has been engineering an international development model to end poverty. It works. It’s proven. It’s scalable. We partner with developing communities around the world and collaborate on projects and programs that equip families with the tools they need to break the cycle of poverty through our five Pillars of Impact: Education, Water, Health, Food, and Opportunity. These pillars address the five primary causes of poverty with holistic and sustainable solutions that work in tandem to transform communities.

Why Water?
Access to clean water has an impact on every aspect of growth of developing communities.

- Water access helps children get an education. Without a source nearby, many families pull their children—usually girls—out of school to help fetch water from miles away.
- Clean water keeps communities healthy. Surface water contains contaminants that can poison or sicken people, and dehydration can further compromise the immune system.
- Reliable water sources keep farms and gardens flourishing. Without water, communities cannot irrigate crops or take care of livestock. When drought comes, famine often follows.
- Clean water powers small businesses. Without the stability of good health from uncontaminated water, owners are regularly sick or incapacitated and businesses fail.
- A combination of the above.

Every development pillar of WE Villages ties back to water. But how can we make sure that communities are gaining reliable access to the clean water they need?

Global and Local Service Projects
As students develop their service projects with one local and one global action in their plan, they will look to local and global organizations and initiatives for their research and even as potential beneficiaries for their service actions. When selecting an organization—whether local or global—it is important for students to consider its credibility. Students may choose to partner with:

- Charitable or non-profit organizations
- State, national, or governmental departments or organizations (which may not be a traditional charity)
- Social enterprises
- A combination of the above

Five Pillars of Impact

Education  Water  Health  Food Security  Opportunity
Planning Your Instruction

Access to Clean Water

Purpose

Students will define the criteria for “clean” water and “reasonable access” as they pertain to this basic human need and right. Students will assess their own access to clean water (as well as conservation efforts) through a series of calculations and estimations. Students will connect the AP® Environmental Science course content and terminology associated with water purification, conservation, and sustainability measures through a review of global and local issues associated with access to clean water and organizational strategies to achieve such efforts. Students (in groups) will develop and implement their own solutions to these global and local issues of access to clean water after analyzing and evaluating several case studies of organizational efforts to increase access to clean water.

Ensure students are collecting evidence of their work as they go along. Following list includes pieces of work you may want to collect through out the year:

- Photos
- Interviews
- Scripts
- Screenshots
- Posters
- Maps
- Reflections
- Thank you notes

Overview

As presented in the Introduction, this teaching module contains four parts. These are also the four rubric topics you will assess your students on in the digital portfolio:

Part 1: Investigate and Learn: Address ways that humans alter natural ecological systems, as well as the cultural and social contexts of environmental problems. These lessons also relate to a variety of service learning concepts, such as the necessity of research in understanding a topic and its effects, and the ways that a topic is connected on local and global levels.

Part 2: Action Plan: Guide students as they form teams, develop their action plans, and reflect on their ideas.

Part 3: Take Action: Provide students with suggestions for how to navigate obstacles, overcome conflicts, record actions, and reflect on their work.

Part 4: Report and Celebrate: Support students as they create portfolios, celebrate their actions, and complete a final reflection on their experiences.

Throughout Parts 1–4, activities that are required for the Recognition Rubric are labeled with an icon (see Icon Legend on page 16). Optional activities that will help students design and complete their service projects, but are not required by the program, are listed in tables throughout each part. These optional activities are available in the AP® with WE Service Program Guide or on the WE website, as indicated in the tables.

The parts within the module may be implemented at a variety of different times based on the preferences and needs of schools, teachers, and administrators. Here are several examples of when Parts 1–4 may be implemented in a school year:
Goals

Based on the 2019–20 AP® Environmental Science Course and Exam Description, these are the curriculum components addressed in these lessons:

### AP® ENVIRONMENTAL SCIENCE CONCEPTS

|                   | • 1.B: Explain environmental concepts and processes.  
|                   | • 2.A: Describe characteristics of an environmental concept, process, or model represented visually.  
|                   | • 2.B: Explain relationships between different characteristics of environmental concepts, processes, or models represented visually: (a) In theoretical contexts (b) In applied contexts  
|                   | • 2.C: Explain how environmental concepts and processes represented visually relate to broader environmental issues.  
|                   | • 3.A: Identify the author’s claim.  
|                   | • 3.B: Describe the author’s perspective and assumptions  
|                   | • 3.C: Describe the author’s reasoning (use of evidence to support a claim).  
|                   | • 3.D: Evaluate the credibility of a source: (a) Recognize bias (b) Scientific accuracy  
|                   | • 7.A: Describe environmental problems  
|                   | • 7.B: Describe potential responses or approaches to environmental problems.  
|                   | • 7.C: Describe disadvantages, advantages, or unintended consequences for potential solutions.  
|                   | • 7.D: Use data and evidence to support a potential solution.  
|                   | • 7.E: Make a claim that proposes a solution to an environmental problem in an applied context.  
|                   | • 7.F: Justify a proposed solution, by explaining potential advantages.  

| Big Ideas | • Big Idea 3: Interactions Between Different Species and the Environment  
|          | • Big Idea 4: Sustainability  

| Enduring Understandings | • EIN-1: Human populations change in reaction to a variety of factors, including social and cultural factors.  
|                         | • EIN-3: Pollutants can have both direct and indirect impacts on the health of organisms, including humans.  
|                         | • STB-1: Humans can mitigate their impact on land and water resources through sustainable use.  
|                         | • STB-3: Human activities, including the use of resources, have physical, chemical, and biological consequences for ecosystems.  

| Learning Objectives | • EIN-1.C: Explain how human populations experience growth and decline.  
|                    | • EIN-3.D: Explain human pathogens and their cycling through the environment.  
|                    | • STB-1.A: Explain the concept of sustainability.  
|                    | • STB-3.B: Describe the impacts of human activities on aquatic ecosystems.  
|                    | • STB-3.C: Describe endocrine disruptors.  
|                    | • STB-3.D: Describe the effects of endocrine disruptors on ecosystems.  
|                    | • STB-3.H: Describe the effect of persistent organic pollutants (POPs) on ecosystems.  
|                    | • STB-3.M: Describe changes to current practices that could reduce the amount of generated waste and their associated benefits and drawbacks.
ESSENTIAL KNOWLEDGE

• EIN-1.C.3: Population growth can be affected by both density-independent factors, such as major storms, fires, heat waves, or droughts, and density-dependent factors, such as access to clean water and air, food availability, disease transmission, or territory size.
• EIN-3.D.4: Poverty-stricken, low-income areas often lack sanitary waste disposal and have contaminated drinking water supplies, leading to havens and opportunities for the spread of infectious diseases.
• STB-1.A.1: Sustainability refers to humans living on Earth and their use of resources without depletion of the resources for future generations. Environmental indicators that can guide humans to sustainability include biological diversity, food production, average global surface temperatures and CO2 concentrations, human population, and resource depletion.
• STB-1.A.2: Sustainable yield is the amount of a renewable resource that can be taken without reducing the available supply.
• STB-3.B.7: Heavy metals used for industry, especially mining and burning of fossil fuels, can reach the groundwater, impacting the drinking water supply.
• STB-3.B.10: When elemental sources of mercury enter aquatic environments, bacteria in the water convert it to highly toxic methylmercury.
• STB-3.C.1: Endocrine disruptors are chemicals that can interfere with the endocrine system of animals.
• STB-3.D.1: Endocrine disruptors can lead to birth defects, developmental disorders, and gender imbalances in fish and other species.
• STB-3.H.1: Persistent organic pollutants (POPs) do not easily break down in the environment because they are synthetic, carbon-based molecules (such as DDT and PCBs).
• STB-3.H.2: Persistent organic pollutants (POPs) can be toxic to organisms because they are soluble in fat, which allows them to accumulate in organisms’ fatty tissues.
• STB-3.H.3: Persistent organic pollutants (POPs) can travel over long distances via wind and water before being redeposited.
• STB-3.M.4: E-waste can be reduced by recycling and reuse. E-wastes may contain hazardous chemicals, including heavy metals such as lead and mercury, which can leach from landfills into groundwater if they are not disposed of properly.

Connections to AP® Environmental Science Focus Areas

Some content from the AP® Environmental Science Course and Exam Description is identified as more challenging for students based on AP® Chief Reader commentary from previous AP® Environmental Science Exams. This content is referred to as a focus area. Activities that address the following focus areas are highlighted throughout the module.

- Identify and describe different levels of clean water—ecosystem, species, and genetic
- Relate the cause of clean water loss with a practical solution
- Use discipline-specific language; Words such as “pollution,” “clean water,” and “habitat” are insufficient and need further qualification
WE Service Concepts

Based on the WE Learning Framework, here are the particular WE Service concepts addressed in this module.

<table>
<thead>
<tr>
<th>STUDENTS WILL UNDERSTAND THAT...</th>

See full WE Learning Framework and details at WE.org/we-schools/program/learning-framework.
Icon Legend

As described in the AP® with WE Service Program Guide, the WE Learning Framework identifies the most relevant core skills students will develop as they progress through this module.

Throughout each part of this module, look for these additional icons to identify the following opportunities and notes:

**Teacher Tip:**
Suggestions for ways to implement or modify the activities with students.

**Focus Area Alert:**
Opportunities for students to practice content and skills that are pivotal for improving student performance in the AP® course and on the AP® Exam (see page 15 for a description of the AP® Chemistry focus areas addressed in this module).

**Check for Understanding:**
Recommendations for ways to formatively assess student progress and mastery of the content and skills practiced in the activities.

Pay particular attention to activities labeled with the red checkmark icon:

**Recognition Checkmark:**
Identifies activities that are required in the Recognition Rubric. We encourage you to use the most effective instructional approaches to meet your students’ needs. You may use alternative activities if they achieve the same outcomes as the required activities and align with the Recognition Rubric. Review the rubric here: [https://apcentral.collegeboard.org/pdf/apwe-recognition-rubric.pdf](https://apcentral.collegeboard.org/pdf/apwe-recognition-rubric.pdf)
Part 1: Investigate and Learn

Investigate and Learn is divided into the following lessons:

- Lesson 1: Local and Global Access to Clean Water
- Lesson 2: Causes and Effects Associated with Access to Clean Water
- Lesson 3: Future Concerns and Solutions

Every student in every AP with WE Service course will do the following as part of their learning and investigation:

- Learn about the issue locally and globally within your course context
- Explore causes and effects locally and globally
- Assess impacts for the future on the local community and the world

WE Service Framework

INVESTIGATE AND LEARN ➞ ACTION PLAN ➞ TAKE ACTION ➞ REPORT AND CELEBRATE

-------------------------------------------

RECORD AND REFLECT
Overview for Part 1: Investigate and Learn

Students will strengthen their understanding of the AP® Environmental Science course content pertaining to the social issue of access to clean water. They will make connections about the need for access to clean water with global and local issues. Encourage students to retain all of their AP® with WE Service work.

### Enduring Understandings

- When humans use natural resources, they alter natural systems.
- Human activities, including the use of resources, have physical, chemical, and biological consequences for ecosystems.
- Pollutants can have both direct and indirect impacts on the health of organisms, including humans.
- Humans can mitigate their impact on land and water resources through sustainable use.

Lesson 1: Local and Global Access to Clean Water

Activity: Focusing on Access to Clean Water

Guiding Question:
Is access to clean water a basic human right? Find relevant articles for your local community. If you can’t find one, you can use Detroit as an example (or any other relevant examples you prefer).

Real World Application:
For homework, have students read the following news article describing how the Detroit City Council shut off water to thousands of residents. As the article describes, many groups, including the United Nations, attested that this action was a violation of human rights.

Lead a discussion with students the next day about the issues raised in the article:

- What is a human right?
- Is access to water a human right?
- Why have outside groups such as the United Nations become involved in the situation in Detroit?
- What role does/should the government play at the local, state, and national levels?
- What is the author’s claim?
- What is the perspective of the author?
- What assumptions does the author make?
- What reasoning does the author use to support their claim?
- What is the credibility of this newspaper as a source?

In class reading or homework (optional)

- “For These Americans, Clean Water Is a Luxury”: www.nytimes.com/2016/10/20/opinion/for-these-americans-clean-water-is-a-luxury.html

For additional resources on the topic of reasonable access to clean water, view the following:

- The following is a resource to the basic definitions of the terms: www.un.org/waterforlifedecade/scarcity.shtml
- For a more critical discussion of water scarcity: www.globalwaterforum.org/2012/05/07/understanding-water-scarcity-definitions-and-measurements
- For an overview of issues related to clean water access: https://www.we.org/en-CA/our-work/we-schools/we-schools-campaigns-and-curriculum/issues-details/global-water
Activity: Identifying Where We Get Our Fresh Water

Guiding Questions:
What are some sources of fresh water? How much water do you use? What ways can you cut back on your water usage to lessen the demand on the fresh water supply?

Real World Application:
Have students watch “Where We Get Our Fresh Water” (https://youtu.be/Pz6AQXQGupQ). This video describes the sources and availability of fresh water on earth and the ways in which that water is used.

After students view the video, lead a discussion about the information in the video:

- How much of the Earth's water supply is fresh water?
- Where is this fresh water found?
- Where do we get our fresh water supply?
- What are the major uses of fresh water?
- What ways could our fresh water supply become “dirty” or polluted?
- Aside from direct water use, what other behaviors of yours affect clean water demands? What changes could you make to lessen this demand?

Lead a discussion and evaluation of personal water use. Have students complete a Personal Water Use Chart for a week. As a class, calculate the total water usage for each student for the week, the average water usage for the class, the average daily water usage for the class, and the average daily water usage for the student’s hometown.

- How does your personal water use affect the rest of the globe?
- What ways might you conserve water on a daily basis?

Assign one or both of the following articles to read for homework in preparation for the next activity.

- “Water Pollution: Everything You Need to Know” (https://www.nrdc.org/stories/water-pollution-everything-you-need-know#causes)

Focus Area Alert:
Perform calculations and work with data. Require students to show their work in calculations, stressing the correct units.

Teacher Tip:
If pressed for time, have students complete the Personal Water Use Chart for one day, and estimate the rest of the week based on that day.
Student Worksheet: Personal Water Use Chart

In the U.S., most of us have access to some of the safest treated water in the world. This is not the case in other parts of the world, where clean water is not as easy as turning on the tap. Water is an important part of our daily lives and we use it for a wide variety of purposes, but do we really understand how much we use?

In this activity, you will track your water use for one week. We will then calculate the average water use in the class and the community in general.

TOTAL

Average Weekly Water Use of the Class ____________________________________________________________

Average Daily Water Use of the Class __________________________________________________________

Average Daily Water Use of the Town ___________________________________________________________

In some parts of the world, water is not readily available and you would have to walk miles to a well to retrieve water to use in your home. Would you be willing to walk to a well and carry all the water you would need for a day back to your home?

**Check for Understanding:**

After the class has completed the calculations, have students write a short paragraph to answer the following two questions:

1. How does your personal water use affect the rest of the globe?

2. What ways might you conserve water on a daily basis?
Lesson 2: Causes and Effects Associated with Access to Clean Water

Now that students have explored definitions of access to water, they will consider what prevents communities from having reasonable access, as well as what problems occur when communities do not have reasonable access to clean water.

Activity: Problem Tree

Have students look at the Problem Tree graphic organizer, which helps guide students in thinking about and articulating the issue as a problem, and then going further by breaking down the causes and effects of the problem. This is necessary before exploring steps needed to address the problem, as it allows students to consider the depth and even the breadth of an issue. Display a larger version of this graphic organizer, perhaps projected on to a screen, and explain the three sections.

Begin at the center of the tree with the problem.

Problem: The issue that is being examined. Because it is not as apparent as the effects, the core problem itself sometimes takes longer to identify. Then go to the roots, which is the investigation of the causes.

Causes: Issues, situations, factors, or phenomena that have led to the problem. Prompt exploration of causes by asking, “Why does the problem exist?” Encourage students to think about the “causes of causes”—the multiple layers of factors that contribute to a problem. Repeat this exercise and think further about the causes of the next levels of causes.

And finally to the leaves, which explore the effects.

Effects: Results created by the problem. As with causes, encourage students to explore multi-layered effects, or “effects of effects.” At first, this part of the issue may appear to be easy to tackle, but without addressing the root cause, only addressing the effects is like trimming leaves and branches—they grow back quickly. Students should also consider the multilayered effects, or “effects of effects” that can arise when a problem goes unaddressed. Students should always ask: “then what happens?” The more students drill into the effects, the more they will deepen their critical thinking and analysis.

Now have students look at the Problem Tree graphic organizer. Guide students in thinking through the process of cause and effect. Use a simplified, non-issue related example first, such as:

Problem: I am often late getting to school.
Cause: Perhaps I did not hear my alarm or got distracted as I was getting ready.
Effect: I am missing instruction, falling behind, and feeling frustrated, etc.

Focus Area Alert:
Encourage students to think back on AP® Environmental Science course content and use discipline-specific terminology when filling out their graphic organizer.
Problem Tree

In your Problem Tree graphic organizer, start by writing the problem in the trunk of the tree, and then look at the causes and effects of an issue. Keep digging to go deeper on the issue to find its supporting and root causes.

Leaves/branches: Effects

These are the results created by the problem. At first, this part of the issue appears easy to tackle, but when leaves and branches are trimmed, they grow back quickly. Consider the multi-layered effects, or “effects of effects,” that can arise when a problem goes unaddressed. Always ask: “Then what happens?”

Ex. Depletion of groundwater reserves

Trunk: Problem

This is the key issue that is being studied. Because it is not as apparent as the leaves, the core problem itself sometimes takes a little longer to identify.

Ex. Access to Clean Water

Roots: Causes

These are the situations or factors that have led to the problem. When exploring the root causes of a problem, ask yourself “Why does this problem exist?” Dig deeper to consider the “causes of causes”—the multiple layers of factors that contribute to a problem.

Ex. Climate change and extended droughts
Activity: Water Pollutants—Their Sources and Effects

In this activity, students will research three major sources of water pollution: PCBs, mercury, and lead.

Students will jigsaw this research, rather than having each student research every source. To do this, divide your class into three groups and assign each group either PCBs, Mercury, or Lead. Have each group research the answers to the following four questions:

- What are the sources of their pollutant?
- How does the pollutant enter the human body?
- What effects does their pollutant have on human health?
- What are steps cities or nations can take to reduce the threat posed by the pollutant?

Students should be able to find some of the answers in their textbook, but they should have access to computers as well so they can search the Internet. Make sure students write down the sources they used to find their information. Students can use the Water Pollutants worksheets in the Student Workbook to take notes.

Once each group has finished, put students into groups of three so that each pollutant is represented in each group. Have students share their findings with their group, so that each student will end with a completely filled out worksheet.

Activity: Water Pollution Globally

Now that students have researched a few specific water pollutants, have them begin to think about how water pollution affects people’s access to clean water on a daily basis, both globally and locally. Begin by showing students the “India’s Polluted River System” video (www.youtube.com/watch?v=eeNSOg5XJh4).

Discuss with students some of the reasons why pollution is so bad in India. Make sure to specifically address the issue of why multinational companies would choose to build a factory in India or China instead of in the United States.

Discuss with students how a country might weigh economic benefit vs. environmental damage. Or, if you have time, this discussion could be done using a technique called argument tennis.

Argument Tennis

- Divide your class in two.
- Each half of the class is given a point of view to defend:
  - (a) The economic benefits these multinational companies provide to India outweigh environmental concerns.
  - (b) The environmental damage these multinational companies cause in India outweighs the economic benefits.
- Groups find evidence to support their assigned point of view.
- Once students are given time to conduct their research, the teacher sets up the room so the two sides are opposite each other. The teacher should stay between the two sides so as not to show preference.
- Choose one side to start the argument. A student from that side should make a point that must be supported by evidence.
- The other side is given 30 seconds to counter their point, again supported by evidence.
- Once a side cannot provide a counterpoint, the other side earns a point.
- Let the other side go first this time. Keep playing until one side wins four points.
Lesson 3: Future Concerns and Solutions

This lesson has students move beyond the causes that inhibit access to clean water to research solutions that can reduce the effects on local and global communities.

Activity: Developing Solutions

Show the short film Project 22 (www.youtube.com/watch?v=B0ky-vMi9fI) to get students to think about developing solutions to address the issue of reasonable access to clean water.

Ask students to engage in an Internet search to begin developing an understanding of specific issues related to access to clean water. This is best done by having students search for organizations that are working to combat this issue. These organizations may be governmental or non-governmental, and you may wish to guide students to search for organizations that are not-for-profit. Students should use the Needs Assessment Worksheet to carry out an analysis (on page 10 of the Student Workbook).

You may also wish to have students use the Solution Tree organizer found on page 26 to keep track of current solutions to combat the issue of access to clean water. Explain how to go from the center of the Solution Tree organizer to the more specific details.

Encourage students to revisit and work in parallel with their Problem Tree, which can help ensure that their solutions are addressing actual problems. They should keep track of any sources they used to fill out the graphic organizer.

Independent Practice

For homework, students should write a one-page report that describes their needs assessment findings on one organization. The report should include the following:

- A description of the social issue at local and global levels
- What is the mission/vision of the organization?
- Identify and describe two of the organization’s existing programs
- Explore the outcomes of the organization’s programs
- Cite your sources

Check for Understanding:

As students work, check to be sure that they are accurately analyzing each organization and determining ongoing needs to address the issue.
Activity: Needs Assessment and Solution Tree

Have students carry out research to begin developing an understanding of specific issues and topics related to their broader issue. For example, access to clean water is a big umbrella for many sub-issues (that are equally large, but more focused) that ladder up to the issue of access to clean water.

This is best done by having student groups carry out research on organizations that are working to combat this issue. Students should use the Needs Assessment Worksheet to carry out an analysis.

Have students use the solutions graphic organizer to keep track of current solutions that are in use to combat the issue of access to clean water. Model how to go from the center of the proposed solution graphic organizer to the more specific details of the key elements to the solution and the possible outcomes of the solution.

Encourage students to revisit and work in parallel with their Problem Tree cause-and-effect graphic organizer, which can help to ensure that their solutions are addressing actual problems. Students should develop four solutions, and their accompanying key elements and possible outcomes. They should keep track of any sources they used to fill out the graphic organizer.

Walk students through the Solution Tree, starting in the middle.

Goal: This is the problem from their Problem Tree, but re-framed as a goal. Then go to the roots, which is the investigation of the solutions.

Solutions: These are the actions needed to solve the problem and achieve the goal stated at the center of the solution tree. When exploring solutions, students should ask, “How will this solve the problem?” Have them dig deeper to think holistically, so that they are looking beyond the short-term and addressing not only the symptoms of the problem but the root causes as well.

And finally to the leaves, which explore the outcomes.

Outcomes: These are the results created by the solution. Results may appear as straightforward as having achieved goals, but when students consider the ripple effect and outcomes of sustainable results, the impact is far-reaching and long-lasting. Always ask, “Then what happens?”

Have students use the Needs Assessment and Solution Tree worksheets, found in the Student Workbook, to carry out an analysis.
Needs Assessment

The following series of questions helps you to analyze and identify ongoing areas of need within organizations addressing your issue.

1. Identify 3-5 organizations working on issues related to the issue your team is working on.

2. What does each organization do well in response to the issue and/or related issues?

3. What could each organization do better in its response?

4. What areas of need related to access to your issue have you learned about that each organization is NOT addressing?

5. Considering all 3-5 organizations, where are there ongoing needs that are not being adequately addressed?

6. Considering all 3-5 organizations, where are there ongoing needs that are being addressed successfully, and to which you can add further efforts to support the issue?
Solution Tree

In your Solution Tree graphic organizer, start by rewriting the problem from your Problem Tree, and reframing it as a goal at the trunk of the tree. Then consider the different solutions (the roots) and possible outcomes of the solutions (the branches).

Leaves/branches: Outcomes

These are the results created by the solution. Results may appear as straightforward as having achieved goals, but when you consider the ripple effects and outcomes of sustainable results, the impact is far-reaching and long-lasting. Always ask: “Then what happens?”

Trunk: Problem

Roots: Solutions

These are the actions needed to solve the problem and achieve the goal stated at the center of the Solution Tree. When exploring solutions, ask yourself “How will this solve the problem?” Dig deeper to think holistically, so that you are looking beyond the short-term and addressing not only the symptoms of the problem but the root causes as well.
Activity: Summarizing the Investigation

As part of their service project, students should summarize their learning to educate their classmates on the issue they have identified and investigated related to the topic of access to clean water. Select an appropriate format for students to complete their summary. For example, students may make class presentations, design posters to hang in the classroom, write blog posts to share with the class, etc. Summaries may be supported by multimedia or print materials that synthesize and analyze the topic and issue on local and global levels.

When summarizing their investigation, students should keep in mind the following:

- What are the key takeaways from your investigation of the issue of access to clean water?
- How are the problems you investigated similar at local and global levels? How are they different?
- How are the solutions you investigated similar at local and global levels? How are they different?
- Why may your investigation be important to other AP® Environmental Science students?

Have students use the Summarizing Your Investigation worksheet, found in the Student Workbook, to complete this activity.
Activity: Making Connections with Students’ Lives

Provide opportunities for students to think about and record their individual and collective learning as they progress through the activities. Students should answer the following reflection question to prepare for Part 2: Action Plan: How can what you are learning in your AP® Environmental Science class support solutions that improve access to clean water?

As they write, the following questions can help students shape their reflections:

- What are the social impacts of lack of access to clean water?
- As you investigated existing programs addressing water access, what did you feel these programs do well, and what did you feel they could do better?
- Who should be responsible for improving water access, locally and globally? What role do you think you could play in addressing water access, locally and globally?
- Based on what you learned about your local and global issue and the actions others are already taking, what are five areas of need that you could address?
- What attracts you to these areas?
- What are some actions that you could take to address this issue?
- What excites you about these actions and the impact you can have?
- How can what you are learning in your AP® Environmental Science class support solutions that improve access to clean water?

Have students use the Reflect: Investigate and Learn worksheet, found in the Student Workbook, to record their reflections.
Activity: Working Independently

Now have students independently complete an adaptation of Free Response Question #1 from the 2010 AP® Environmental Science exam, which addresses the content in this module. The question, shown below, is available as a student handout in the appendix of this module. Use the scoring guidelines found on the AP® Central website to assess student performance and provide feedback on any misconceptions or missed understandings.

2010 AP® ENVIRONMENTAL SCIENCE FREE-RESPONSE QUESTION (Adaptation)

Fremont Gazette

Deadly Pollutants Kill Children in India and China

“Contaminated industrial sites in India and China top a new ranking of the world’s most polluted places, where millions of people are threatened by various chemical pollutants,” said Dr. Egguen, President of Fremont Friends of the Planet, an environmental advocacy organization. She said that the industrial town of Vapi, India, is a new addition to the list of worst-polluted places on Earth, based on the magnitude of the pollution and the number of people who are put at risk. She said, “Thousands of children, who are especially susceptible to toxic pollutants, are sick and dying in these top ten polluted places.”

Dr. Egguen pointed out that mining and unregulated industrial production are the major culprits behind the menacing pollution. She described Vapi as a region overwhelmed by more than 50 chemical manufacturers that poison the local soils and groundwater with toxic pollutants such as PCBs, mercury, and lead. In fact, levels of heavy metals found in local produce are 60 times greater than those found in produce grown in unpolluted areas.

Choose any ONE of the three pollutants mentioned above and respond to each of the following:

- Describe one specific source, other than the local chemical plants, for the toxic pollutant you chose.
- Describe how the pollutant you chose enters the human body and one specific effect it can have on human health.
- Describe TWO specific steps, other than an outright ban, that a city or nation can take to reduce the threat posed by this pollutant.

Discuss TWO reasons why a multinational company would choose to build a manufacturing facility in India and/or China instead of in the United States or Europe.

*For scoring guidelines please refer to AP Central website.*
Part 2: Action Plan

The Action Plan section is divided into four parts:

- Connect Learning
- Form Teams
- Develop Action Plan
  - Goal Setting
  - Understanding Approaches to Taking Action
  - Determining Clarity and Relevance of Goals
  - Measuring Success
  - Setting S.M.A.R.T. Goals
  - Identifying Resources and Creating a Network
  - Developing a Timeline
- Reflect

WE Service Framework

INVESTIGATE AND LEARN ➤ ACTION PLAN ➤ TAKE ACTION ➤ REPORT AND CELEBRATE

__________________________________________ RECORD AND REFLECT

CLEAN WATER MODULE FOR AP® ENVIRONMENTAL SCIENCE
Overview for Part 2: Action Plan

Students apply the knowledge they acquired through the Investigate and Learn lessons to develop a plan through which they will address one local and one global service action.

Key Takeaways

- Completing a service action requires a set of skills, including working as a team and creating action plans.
- Action plans involve setting goals, identifying measurements of success, creating a timeline for each task, assigning specific responsibilities to each team member, and preparing to network with others to complete tasks.
- Three approaches to completing a service action are direct service, indirect service, and advocacy.

This Section Contains:

- Optional activities that you may choose to use with your class to deepen student understanding of particular elements of action planning.
- Templates that all students should complete to help them successfully meet the recognition criteria.

Connect Learning

Activity: Determining Interests

As a class, discuss the following:

- What issues related to your topic do you hear about on the news or read in newspapers and online articles? Why do you think these stories are covered by the media?
- What issues related to your topic do you think the general public is not aware of? Why do you think they are unaware?
- What issues related to your topic really bother you, even if you do not know a lot about them? Why are you bothered by these issues?
- If you were a world leader, what kinds of problems related to your topic would you tackle?

Teacher Tip:

Support students in determining their personal interests by incorporating an activity in which they think back to the problems and solutions they identified in Part 1: Investigate and Learn. Have students brainstorm the global and local issues they feel are most important and personally interesting to them.
Form Teams

It is recommended that students work in teams of four to six to plan and carry out their AP with WE Service projects. However, students may work individually or in any size group as approved by their teacher. Each team will decide on one local and one global action, and then create a plan that details how the actions will be achieved. Since each team will focus on a particular action, encourage students to form teams based on their interest in working on similar local and global issues. The more inspired and passionate students are about the issue they identify around the topic of access to clean water, the more creative they will be with the actions they develop. In order for students to pick teams, have students present the local and global issues they are interested in, then join forces with other students who are addressing similar issues.

Teacher Tips:

- When students first meet with their team, encourage them to create a contract so all members have a clear understanding of their own role and responsibilities, as well as those of the other members of the team. This will help to identify and establish group norms, including a plan and process for conflict resolution.
- Create a spreadsheet that the teacher can fill in with group members, including module (of choice), columns for check-ins, numbers, and agencies worked with. Teacher can also add a column to grade as each piece is completed.
- Instead of emphasizing skills and talents, ensure students are grouped based on the issue that is most important to them.
- If a big group forms around one issue, have students break into two groups and ensure they design different action plans on the same topic.
## Resources to Support Forming and Working in Teams

Resources are available in the AP with WE Service Program Guide: [https://apcentral.collegeboard.org/pdf/program-guide.pdf](https://apcentral.collegeboard.org/pdf/program-guide.pdf).

<table>
<thead>
<tr>
<th>RESOURCE AND DESCRIPTION</th>
<th>HOW TO USE THIS RESOURCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gift + Issue = Change</td>
<td>Use this activity to help students think about how they might individually contribute to an action that they feel passionate about.</td>
</tr>
<tr>
<td>Finding Passion with the Issue Compass</td>
<td>This interactive activity can be used to align students into action teams according to their interests and talents.</td>
</tr>
<tr>
<td>Exploring the Four Leadership Styles</td>
<td>Use this activity to help students better understand their individual strengths and the strengths of their teammates. By giving each person the power to be a leader, no one person will feel the burden of being responsible for the entire project.</td>
</tr>
</tbody>
</table>

## Resources to Support Collaborating as a Team

Resources are available in the AP with WE Service Program Guide: [https://apcentral.collegeboard.org/pdf/program-guide.pdf](https://apcentral.collegeboard.org/pdf/program-guide.pdf).

<table>
<thead>
<tr>
<th>RESOURCE AND DESCRIPTION</th>
<th>HOW TO USE THIS RESOURCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Creating a Safe Space</td>
<td>Use this activity to help teams create guidelines around the way they interact and make decisions as a team.</td>
</tr>
<tr>
<td>Drafting a Team Contract</td>
<td>Use the contract to help students identify and establish group norms, including a plan and process for conflict resolution. This is both a key skill that students will learn and a proactive approach to problem-solving within a team environment. Use the results from the Exploring the Four Leadership Styles activity to help determine roles and responsibilities of each student in the group.</td>
</tr>
<tr>
<td>Establishing Roles and Responsibilities</td>
<td>Use this activity to share with students how they can divide and conquer major areas of responsibility, and the roles they can each assume to make their service project both personally fulfilling and an overall success.</td>
</tr>
</tbody>
</table>
Develop Action Plan

After students have formed their teams, the next step is for teams to build out an action plan that:

- Identifies team goal(s)
- Establishes their metrics of success
- Identifies their network and required resources
- Creates a timeline for completing their actions by sequencing necessary tasks and identifying individual roles and responsibilities

**Teacher Tip:**
Be sure teams create goals that are specific and measurable. In addition to meeting the Recognition Rubric requirements, this will allow students to report on the impact of their project in Part 4: Report and Celebrate.

**Activity: Goal Setting**

Each team must create a goal for the team’s action. This goal will need to:

- Be clear, measurable, and informed by the team member’s needs assessment
- Incorporate one global and one local action
- Achieve direct service, indirect service, or advocacy.

Help students generate and decide on a team action goal using the following activities

**Activity: Understanding Approaches to Taking Action**

Every great plan begins with establishing clear goals. But first, help students understand the types of actions their team might take through their action project. There are three approaches, generally speaking, to taking action:

- **Direct service**: Personally engaging with and providing hands-on services to those in need (usually in conjunction with an organization).
- **Indirect service**: Channeling resources to the needs of a community—locally, nationally, or internationally.
- **Advocacy**: Educating others about an issue to increase visibility and follow up with an action that focuses on enacting change.

**Resources and Ideas to Support Selecting a Type of Service**

Resources are available in the AP with WE Service Program Guide: [https://apcentral.collegeboard.org/pdf/program-guide.pdf](https://apcentral.collegeboard.org/pdf/program-guide.pdf).

### DIRECT SERVICE

**WHAT IS IT?**
Personally engaging with and providing hands-on service to those in need (usually in conjunction with an organization).

**EXAMPLE GOAL**
By the end of the semester, we will support a local food bank and shelter by packing and serving food to people in the community. We will also visit our neighboring elementary school and teach a lesson on food insecurity in our community.

**ACTIONS**
- Reach out to local shelters and food banks to arrange a day for the class to visit and provide hands-on support
- Once a date has been decided, make sure students all have permission to travel to the food bank (if during school hours)
- Connect with teachers/administration at local elementary school and arrange to visit a classroom to teach a lesson to young students on food insecurity
- Create and print worksheets to use with younger students

### INDIRECT SERVICE

**WHAT IS IT?**
Channeling resources to the needs of a community—locally, nationally, or internationally.

**EXAMPLE GOAL**
By the end of the year, we will create a storage and donation system for local families in need, where they can access furniture and other household items. We will develop a system for donations, pick-ups, and inventory.

**ACTIONS**
- Conduct research into which items are most needed by community members (e.g., bed frames, dining tables, household goods, etc.)
- Reach out to local businesses to try to get a storage space donated
- Connect with school social workers/administration to gain their support
- Put up flyers around school and in the community, asking for donations (list specific items needed), including instructions on how/where to donate
- Develop an online database for tracking donations and pick-ups, and maintaining inventory
- Share pick-up information with local shelters, churches, community centers, etc.
- Share the donation system with school social workers, so that they can maintain the project in future years

### ADVOCACY

**WHAT IS IT?**
Educating others about an issue to increase visibility and following up with an action that focuses on enacting change. Actions around advocacy often look like raising awareness, but without a strong call to action within the initiative as a whole. Educating others is not considered service in and of itself.

**EXAMPLE GOAL**
Through an informative art piece, we will educate our school community about the waste created by single-use plastic water bottles, and the impact they have on the environment. Then, we will sell reusable water bottles at school, and the proceeds from the sale will go toward clean water projects in developing countries.

**ACTIONS**
- Research the impact of single-use plastic water bottles around the school and in the local community
- Plan out and create a 3D sculpture that incorporates informative text on the issue of single-use plastics
- Seek permission from school administration to display the piece in a common area of the school
- Design and order water bottles to sell at school
- Research and select an international organization that focuses on clean water projects
- Organize a selling schedule for the water bottles, donate profits

Approaches to Taking Action Information Sheet: Copyright © 2018 WE. All rights reserved.
Activity: Determining Clarity and Relevance of Goals

In their teams, students should now begin to develop their goal(s) for their action plan. Setting effective goals is a more difficult skill than most people imagine, but once students learn to employ one or more techniques for developing clear goals, it will serve them in all endeavors. Have students split up into their action teams and instruct them to brainstorm actions they would like to take, sharing from their personal reflections from the previous section, and drawing from their previous investigation and research, along with the needs assessment and reflections. Encourage students to use the 5Ws (what, where, when, why, who, and how) to express their overarching goal(s) and to be as clear and specific as they can.

As they write drafts of their goal(s), they should ask themselves the following questions to assess the clarity and effectiveness of their goal:

- Is this goal specific enough so that we know exactly what our team will accomplish?
- Can we measure whether or not this goal was fully accomplished?
- Is it achievable within our project period?
- Is it relevant to the social issue we are aiming to address?
- Do we know the deadline by which it will be accomplished?

Activity: Measuring Success

As part of goal setting, establishing Measurements for Success is an important way of knowing if the goal has been achieved. Take time to discuss measurement in a bit more detail. Measurement is an aspect of the goal-setting exercise that students should understand before they begin executing an action plan. Students will need to understand how they will measure positive outcomes so that they understand what success looks like and how they will know they have achieved their goal. Is it based on the number of people they have reached through their actions? This will require teams to keep track of numbers. Or are they also looking at how the individuals reached have been affected? A survey with written answers (or multiple choice options) could do the trick. Share with students that measuring success can take two forms:

- Qualitative data is usually descriptive data that provides insights into what/how people think or feel. Qualitative data is harder to analyze than quantitative data.
- Quantitative data usually provides a numbers-based measurement (with associated units) such as quantity, amount, or range.

Teacher Tip:

Have teams define quantitative and qualitative data sets for their action plan; then brainstorm a list of each that applies to their action project. Remind students that establishing their criteria for success and the corresponding metrics is an ongoing process. As they dive deeper into their action planning and execution, it will become clearer for students what kind of data they will need and how they will obtain it. The information may be collected by multiple team members. However, it is good to designate at least one person to any (and each) of the methods on their list.
**Activity: Setting S.M.A.R.T. Goals**

A S.M.A.R.T. goal is Specific, Measurable, Attainable, Relevant, and Time-bound.

Before your group starts their campaigns or actions, you’re going to need a good plan. By having a plan, you will have the means to establish a defined goal and a reliable way to reach that goal. Brainstorming ideas will allow you to determine clarity and relevance for your service project. Your criteria will serve as a guideline to ensure that you have a way to evaluate your outcome and see whether or not you’ve achieved what you set out to do. So whether your group is trying to hit a particular fundraising total, organize a huge event with a certain number of attendees, or reach a target audience with awareness-raising speeches, you’ll want to start with a goal and a plan. The surest way to do this? Build a S.M.A.R.T. goal.

**Resources on Goal Setting**

Resources are available in the AP with WE Service Program Guide: [https://apcentral.collegeboard.org/pdf/program-guide.pdf](https://apcentral.collegeboard.org/pdf/program-guide.pdf).

<table>

<td>Creating Measurements of Success</td>
<td>Help students understand the difference between qualitative and quantitative data, and how to go about creating and establishing the right measures of success for each team’s project.</td>
</tr>
<tr>
<td>Collecting Evidence and Artifacts</td>
<td>Use this resource to help students determine the type of data they need to collect, and then how they can go about gathering the info they need. The data and information students gather will feed into their team executive summary at the end of the overall module.</td>
</tr>
<tr>
<td>Creating Surveys and Feedback Forms</td>
<td>Use this resource to show students how they can create their own surveys and feedback forms by considering all the relevant data and information they will need. Sample surveys and forms will provide further guidance.</td>
</tr>
</tbody>
</table>
Activity: Identifying Resources and Creating a Network

As students develop their goals and measures of success, they will start to identify what they need to execute their action plans. This will include creating connections with people, such as within (but not limited to) the school, your community, different organizations and businesses, topic experts and speakers, media outlets, the blogging/social media community, etc. These people will serve as supporters and amplifiers, as well as providers of information and resources.

For this latter part, students will need to identify the resources they need to accomplish their goals. This can include (but is not limited to):

- Facts and statistics (found through research or materials from other organizations)
- Tools and supplies (this list can be endless, but may include things like card stock, paint, tables, chairs, microphones, water buckets and sponges, labeled boxes to collect items, collection jars, etc.)
- Stories of individuals who benefit from the services of the organization
- Access to space and/or venues
- Methods and resources for producing necessary materials or media

Activity: Developing a Timeline

A key to success in action planning is developing a careful timeline. Not only will it help students allot the appropriate time to each task and keep them on track, but breaking up a large task or action into smaller, more manageable tasks will help them address all the necessary details in a timely fashion.

Resources to Support Identifying Resources and Creating a Timeline

Resources are available in the AP with WE Service Program Guide: https://apcentral.collegeboard.org/pdf/program-guide.pdf.

Teacher Tip:

Emphasize to students that timelines are meant for them to have a date to work toward. When they begin working with organizations the timelines will need to be flexible.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Creating a Timeline</td>
<td>This activity will help students allot the appropriate time to each task and keep them on track. It will also help them break up a large task or action into smaller, more manageable tasks to effectively help them address all the necessary details in a timely fashion.</td>
</tr>
<tr>
<td>Identifying and Sequencing Tasks</td>
<td>This activity will help students think about each step of their action project and how to plot each step as an actionable task in a timeline.</td>
</tr>
<tr>
<td>Identifying Task Owners</td>
<td>Use this activity to show students how to effectively divide tasks amongst team members. Some tasks will be a part of each individual’s overall role and responsibilities, and some will be based on personal interests, skills, and strengths.</td>
</tr>
<tr>
<td>Identifying Resources and Creating a Network</td>
<td>Use this activity to help students create a networking map to help them keep track of the people they will be working with through their action plan. They can also document the resources they will need to access, either through their network or as an item they will need to source separately.</td>
</tr>
</tbody>
</table>
Activity: Creating the Action Plan

After working as a team to identify team goals, establish metrics of success, determine their network and required resources, create a timeline for completing their actions, and identify individual roles and responsibilities, students are ready to put all their ideas in writing. By creating an action plan, all team members are committing to support their team in carrying out the proposed project(s).

**Teacher Tip:**

Have students create the local action plan first, complete the hours, and then have them complete a separate plan for their global hours.

Please keep in mind that there are no hours requirement that you need to meet, but this step will help students understand the time they invested in their projects.

- Have students use the Avoiding the Five Action Planning Pitfalls Tip Sheet, found in the Student Workbook, to review common mistakes made during action planning and to ensure these have been avoided.
- Have students use the Creating an Action Plan worksheet, found in the Student Workbook, to help build out their action plan.
Reflect

After completing their action plan, students should individually reflect on their teamwork and action planning thus far. Teams should then share their plan, describe how the project addresses the issue at local and global levels, and make connections to the AP® course.

**Activity: Reflecting on Action Plan**

Provide students with questions to help them reflect on their experiences working as a member of a team and creating an action plan.

- What is the issue that your team is taking action on? Why is this issue important to you? Why is this issue important to your team?
- What action is your team planning to take? How does this action fulfill an opportunity identified in your needs assessment?
- What are you most passionate and excited about in your action plan?
- Why is goal setting so important, and how can you imagine using goal-setting techniques in your life, future action plans, or other activities? How does your action goal relate to your AP® course?
- What kinds of leadership qualities do you hope to develop as you continue to take action?
- Why is teamwork so essential to carrying out effective service projects to address local and global issues?
- Having planned to make a difference on local and global issues, what have you learned about your ability to create social change?

**Check for Understanding:**

Through this reflection, students should highlight why the issue is important to them, how they can make a contribution, why certain aspects of action planning (such as goal setting) are important life and academic skills, what connections they have made to their AP® course, and what they have learned so far.

**Teacher Tips:**

- As part of their AP® with WE Service project, students will need to track their work. Look ahead to Part 4 to review and share expectations with students so that they are keeping records, taking photos, collecting documents, and tracking data.
- Educating others about their local and global issue is a great way for students to share their learning. Invite teams to hold an educational event or campaign to raise awareness about the social issue they have studied, which hopefully will have the power to compel their class (or community) to action. Students should consider what format they would like to use, based on their action. It may be a public speech at their school or in their community, a newspaper article, a website, a social media campaign, a short story, an artistic display, etc. It is also a great way to share the ideas they have developed in their action plan and how they will take action on the issue. This is not the action in itself but rather the education on the issue and the action plan.
Resources to Support Deeper Reflection and Educating Others

Resources are available in the AP with WE Service Program Guide: https://apcentral.collegeboard.org/pdf/program-guide.pdf.

<table>
<thead>
<tr>
<th>RESOURCE AND DESCRIPTION</th>
<th>HOW TO USE THIS RESOURCE</th>
</tr>
</thead>
</table>
| **Perfecting the Elevator Pitch**  
This activity helps students understand that what they say about their actions has the potential to do several things, including inform, appeal to emotions, persuade, and compel others to take action themselves. | Use this activity to help students create the proper “elevator pitch” for their project as they think about how to create a compelling message about what they have learned about their issue and what they will do about it. |
| **Developing a Deep Understanding of Your Issue and Massaging Your Message**  
This activity highlights how educating others about an issue means students must be knowledgeable about it. | Use this activity and case study to show students how to think critically about their issue as they learn to ask informed and thoughtful questions, and assess the gaps in their knowledge and the information they need to know. |
| **Ensuring Message Credibility**  
In order to gain support, every team’s message should be able to stand up to the critics they may face. This activity will help students ensure the credibility of their message. | Use this activity to have students run three checks on the credibility of their message: creating an annotated bibliography, fact checking their message, and presenting to the class for a peer-review and question period. |
| **Spreading the Word**  
A message is only powerful if it reaches the right people. This activity, along with accompanying worksheets and templates, guides in developing effective communications strategies and a communications plan. | Use this activity to have students brainstorm various communications methods and assess each one’s effectiveness. Then, they will develop a communications plan around their selected method to detail who their message is intended for, how the message will be communicated, and when it will be delivered. |
| **Practice, Practice, Practice**  
This activity highlights how public speaking is a powerful force that can break the silence and raise awareness of difficult issues. | Use this activity and case study to have students read, listen to, or watch some examples of famous speeches to identify how the speaker uses the three I’s—Influence, Involve, and Inspire—with their audience. |

Use the Reflect: Action Plan worksheet in the Student Workbook to reflect on what you have learned.
Part 3: Take Action

The Take Action section is divided into two parts:

- Connect Learning
- Re-Inspire and Reflect

WE Service Framework

INVESTIGATE AND LEARN ➔ ACTION PLAN ➔ TAKE ACTION ➔ REPORT AND CELEBRATE

_________________________ RECORD AND REFLECT ________________________
Overview for Part 3: Take Action

As students take action, they will be equipped with tools to navigate obstacles, mitigate conflicts, collect evidence, and record their actions, while also learning how to maintain their drive and inspiration.

**Key Takeaways**
- Effective teamwork is strengthened through abilities to navigate obstacles and overcome conflicts.
- The impact of an action can be measured by the collection of evidence and recording actions.
- Re-inspiration is important when caught up in the details.

**This Section Contains:**
- Templates that all students should complete to help them successfully meet the recognition criteria.
- Optional activities that you may choose to use with your class to deepen student understanding of particular elements of taking action, effective teamwork, and recording actions.

**Resources on Determining Effective Teamwork, Navigating Obstacles, and Overcoming Conflicts**

In Part 3: Take Action, you will use these resources to help students with practicing positive teamwork, navigating obstacles, and planning for contingencies as they begin to take action.

Resources are available in the AP with WE Service Program Guide: [https://apcentral.collegeboard.org/pdf/program-guide.pdf](https://apcentral.collegeboard.org/pdf/program-guide.pdf).

<table>
<thead>

<tr>
<td><strong>Ezra Frech’s Story</strong></td>
<td>Ezra’s story (available at <a href="https://www.youtube.com/watch?v=KUqmJzoQQYQ">https://www.youtube.com/watch?v=KUqmJzoQQYQ</a>) highlights perseverance and tenacity. On losing his leg and gaining a transplanted thumb, he says, “And this hasn’t slowed me down at all!” He is his school’s starting quarterback and can shoot hoops for days.</td>
</tr>
<tr>
<td><strong>Practicing Positive Teamwork and Conflict Mediation</strong></td>
<td>Use this tip sheet and worksheet to help students understand conflict-mediation techniques and the power of constructive feedback to keep team dynamics positive and ensure their teammates feel supported and appreciated.</td>
</tr>
<tr>
<td><strong>Navigating Obstacles</strong></td>
<td>Help students gain a better understanding of how others have successfully navigated and overcome obstacles using this case study on Spencer West, a motivational speaker and author of <em>Standing Tall: My Journey</em>, which underscores teamwork and focus on goals.</td>
</tr>
<tr>
<td><strong>Planning for Contingencies</strong></td>
<td>This activity helps students work through the process of proactively identifying potential issues and considering practical solutions so that they can plan ahead.</td>
</tr>
</tbody>
</table>
Activity: Student Log Sheet

In addition to the information, artifacts, analyses, and reflection pieces that you collect and complete, you will need to keep track of time spent on your action projects, reflect on your experiences, and collect the appropriate verification where needed. As you reflect, some of the things you may think about include:

› What did you accomplish today?
› What (if any) were the major successes or big wins?
› How can you build on these successes?
› What (if any) were the setbacks, minor or major?
› What is your plan to mitigate or resolve these issues?
› What do you plan to accomplish tomorrow/next class/next meeting?
› How are you feeling about the progress of the action so far?
› Did you collect the qualitative data you set out in your action plan? What are the testimonials telling you so far (if applicable)? Are there any tweaks or changes you need to make with your action plan?
› Did you collect the quantitative data you set out in your action plan? What are the numbers telling you so far (if applicable)? Are there any tweaks or changes you need to make with your action plan?
› What is still missing and how will you get the information you need?
› How did your team pull together? What were your teamwork successes? What conflicts or obstacles did you resolve or overcome? How can you be stronger as a team?

Have students use the Student Log Sheet, found in the Student Workbook, to help record and keep track of their activities and reflections.
Re-Inspire and Reflect

In the process of carrying out an action, team members will often lose inspiration or momentum. Help students reconnect with their original motivation for taking action to empower them as change-makers.

Individually, ask students to reflect on their own story as someone who is interested in changing the world through action. Provide them with the following questions to reflect on their story as an agent of change.

**Activity: Reflecting on Take Action**

Provide students with questions to help them reflect on their experiences of taking action as a team.

- How will you continue the work that you and your team started with this project?
- Changing the world is hard work, and a lot of fun too! What are the top three lessons you have learned during your service project?
- What is your story as an agent of change?

**Resources on Re-Inspiration**

Resources are available in the AP with WE Service Program Guide: [https://apcentral.collegeboard.org/pdf/program-guide.pdf](https://apcentral.collegeboard.org/pdf/program-guide.pdf).

<table>
<thead>
<tr>
<th>RESOURCE AND DESCRIPTION</th>
<th>HOW TO USE THIS RESOURCE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Craig Kielburger's Story</strong></td>
<td>Use the various resources—including videos, articles, and books Craig has written—to inspire students with the knowledge that passion and determination can truly change the world. Access the resources here: <a href="https://www.we.org/en-CA/about-we/about-us">https://www.we.org/en-CA/about-we/about-us</a>.</td>
</tr>
<tr>
<td><strong>Ally Del Monte's Story</strong></td>
<td>Use Ally’s story (available at <a href="https://www.youtube.com/watch?v=QhHLekYrrp8">https://www.youtube.com/watch?v=QhHLekYrrp8</a>) to inspire students and spark a conversation. Ally talks about bullying and its terrifying impact, but she also talks about overcoming the bullying and leading by example.</td>
</tr>
<tr>
<td><strong>Razia Hutchins and Maurice Young’s Story</strong></td>
<td>Use Razia and Maurice’s story (available at <a href="https://www.therenewalproject.com/fighting-against-chicagos-gun-violence-with-peace/">https://www.therenewalproject.com/fighting-against-chicagos-gun-violence-with-peace/</a>) to inspire students about how a passion-driven initiative can make a life-altering impact—on those who lead the initiative as well as those who will be inspired to join.</td>
</tr>
</tbody>
</table>
The Report and Celebrate section is divided into three parts:

- Connect Learning
- Celebrate
- Complete Final Summary and Reflection

WE Service Framework

INVESTIGATE AND LEARN ➔ ACTION PLAN ➔ TAKE ACTION ➔ REPORT AND CELEBRATE

_________________________ RECORD AND REFLECT __________________________
Overview for Part 4: Report and Celebrate

Students will compile and showcase their work. They will then celebrate their accomplishments and look ahead at ways to continue to sustain their actions.

Key Takeaways

- Devoting time to serving the greater community can positively affect the individual and the community.
- Service learning enables students to make local and global connections to AP® course content.

This Section Contains:

- Templates that all students should complete to help them successfully meet the recognition criteria.
- Tables containing optional activities that you may choose to use with your class to deepen student understanding of particular elements of Report and Celebrate.
Activity: Understanding the Purpose of Showcasing Work

Discuss the following:

- Why is it important to put together evidence of your service project?
- What is the value of showcasing your work?
- What are the different ways in which portfolios can be presented? Are some ways more effective than others? How and why?
- How can a portfolio be used to educate, inform, and guide other students in creating their portfolios?

Activity: Collect Artifacts

To showcase their work, instruct students to consider including elements they would find interesting and helpful to have if they were just beginning their action. What would they include to help students who are only beginning their action planning?

Putting Together a Portfolio of Artifacts

A portfolio is a collection of work, material, and achievements that you believe best explain and represent your AP® with WE Service work. It can take one or more forms:

- An online presentation through Prezi or PowerPoint
- A blog or a website, or any other online tool that you may choose
- Video presentation
- Physical portfolio displayed on a presentation board, in a binder or scrapbook, etc.

Focus Area Alert:

Have students describe the steps and actions they took to effect change. They should describe any policies, regulations, or laws that could be implemented and enforced to facilitate continued change in this area.
Celebrate

Optional Activity

Amazing actions, incredible impacts, and outstanding student leadership deserve to be celebrated. It is important to honor the work students have done and recognize the impact they have had on their communities, the nation, and the world. As a class (or perhaps a school, if other AP® with WE Service courses exist in the school), organize a celebration that fits the actions that the students have taken. A few celebration ideas include:

- WE Day
- A school-wide assembly
- A project fair for the whole school to visit
- An outdoor cinema-style documentary screening
- Poster exhibition
- School newsletter, newspaper, or special-edition magazine

Do not forget to share and celebrate over social media:
Post on facebook.com/WEmovement • Tweet @WEmovement, #WEday, #APWEServe

Teacher Tip:

Students have seen what they can accomplish as small groups, so put together all of their numbers so they can see the change they affected as a whole group.

Resources on Celebrating...

Celebrate with WE Day

Imagine a stadium-sized celebration of thousands of students who share a passion for making the world a better place. Imagine a global roster of speakers and performers including Nobel Prize-winner Malala Yousafzai, Martin Luther King III, Demi Lovato, and Selena Gomez. Imagine an event where young service leaders are the VIPs! That’s WE Day.

WE Day Connect

WE Day Connect is an interactive, online event, hosted by WE Day talent, for students and educators across North America. In this 90-minute program, students celebrate selfless acts of volunteerism and learn how their peers are working to make a difference in their local and global communities. During our first WE Day Connect event, 30,000 people tuned in, making this our largest youth attendance for a WE Day to date! Learn more at WE.org/en-CA/our-work/we-day/we-day-connect

WE Day Special

We’ve teamed up with some amazing partners to bring the power of WE to you—wherever you live. The WE Day broadcast will bring families together for an evening of inspiration and empowerment through incredible speeches and performances by people who are making a difference in their communities. Watch the WE Day special online at WE.org/broadcast.

WE DayX

Bring the power of WE Day to your school. Kick off your year of action or celebrate the end of one with your own WE Day-style assembly, and unite your school for a better world. With WE DayX, any group can host their own event in the true spirit of celebrating and inspiring local change-makers. Learn more at WE.org/wedayx.

WE Day Webcast

Can’t make it to WE Day? Watch the live webcasts of each WE Day event online at WE.org/watchweday. For a list of event days, check out WE.org/we-day-events.

Earn Your Way

You can’t buy a ticket to WE Day. As an AP® with WE Service class, you earn your way there through your service-projects and are invited to the WE Day closest to you! Visit WE.org/weday to learn more.
Celebrate with Social Media

Social media is a great tool to show all the amazing work your students are doing! Join the online conversation and create fun, engaging content to share your big ideas. Whether you will be running your group’s accounts or teaching your students how to run social media in a fun, safe, responsible, and effective way, these tips will provide creative ways to amplify your projects in the digital space!

**Getting connected.** This is the best place to get started. Make it a team effort and tell your school that you’ll be posting all about the amazing work they’ll be doing. Grow your network by adding group members and students on all of your social media accounts. Stay digitally active and keep up the conversation online! Engage with posts using likes and motivate each other with comments.

**Take great photos.** Eye-catching visuals are an absolute necessity when it comes to social media! Bright backgrounds, daylight, and big smiles are the best combination for an awesome picture. Mix it up by changing up settings. (One photo can be in a classroom; another can be outside!) This will add variety to your feed and make it much more interesting.

**Share in a timely fashion.** Want to know a fact about social media? It only thrives if people see it. Post at times that will guarantee views. Sharing during lunch break and right after school will ensure your content gets the most visibility.

**Updates!** Does your latest project include a goal you’re trying to reach? Keep your school updated on how close you are! Provide updates as soon as you get them, to keep your students and teachers in the know. That post might be the extra push you need to achieve your goal.

**Use hashtags.** Craving inspiration to spice up your campaign? See what others are doing by looking up the hashtag.

**Gifs!** Take your feed to the next level with these short animations. Download a GIF maker from your preferred app store and fuse your photos together to liven up your newsfeed.

**Tag—you’re it!** Here’s a fun way to get your school involved: play a game of digital tag. Once you’ve posted, have students tag five friends and challenge those friends to tag and share with five others. You’d be surprised how fast word gets around! (PS: This works even better if you all use the same hashtags in your captions.)

**Create a challenge on the WE Day app!** Amplify your latest project with a challenge on the WE Day app! Not only will your friends be psyched to take it, it’ll also be available for all app users so they can contribute to your project! Make it quick and related to your project, and amplify it further by sharing it on your social channels!

**Share with us.** We love seeing how your projects are going! Tag your posts with #WEday, #WEschools and #APWEServe. They might just get featured!
Activity: Complete Final Executive Summary

Once students have completed their action, submitted their evidence, and celebrated their work, students may complete an executive summary as a team. The executive summaries offer a snapshot of the team’s outcomes based on:

- Summary of the team’s work and individual contributions
- Analysis and highlights of evidence collected
- Explanation of the project impact and its significance within a larger context
- Summary of what they learned about their AP® course through the service project

Activity: Reflect on the Overall Service Experience

Individually, students complete a final reflection that describes their overall service experience. Students reflect on their thoughts at the start of the project and how they feel they have grown over the course of their service work. What do they now understand about the role of service and active citizenship, especially as an application of their learning?

Activity: Record and Reflect

Using the following questions to guide your writing, reflect on the overall action project, which will inform the development and assembly of your portfolio.

Overall, in this action project:

- What were your most important successes as a team, and what were the important factors that helped you accomplish those successes?
- What obstacles did your team overcome and what strategies were important in navigating those challenges?
- What was your favorite moment in carrying out your action?
- What are you most proud of?
- If you could go back to the start, what advice would you give yourself or your team? Is there anything you would do differently?
- How is your community/the nation/the world a better place because of your action?
- How have you developed as a global citizen in taking action? What plans do you have to continue your work as a change-maker?
Completed the module? Register to become a WE School!

Congratulations on implementing and completing your service projects. Did you know that if students at your school complete at least one local and one global action, your school is eligible to become a WE School? Spread pride throughout your school and unlock unique opportunities by starting a WE Schools group! Check out WE.org and look for the WE Schools application.
