Drawing Selected Works, *Score 3*

Scoring Criteria

2-D/3-D/Drawing Art and Design Skills

Visual evidence of **moderate** 2-D/3-D/Drawing **skills**.

Materials, Processes, and Ideas

Visual relationships among materials, processes, and ideas are **evident** but **may be unclear** or **inconsistently demonstrated**.

Writing

Written evidence **identifies** materials, processes, and ideas.

Rationale for Score

The Selected Works section of this portfolio demonstrates moderate or adequate drawing skills of mark-making, line, surface, light and shade, and composition. The centered compositional arrangements, a narrow range of light and shade, and limited use of space, accompanied by moderate skills (abilities) to render chosen content keep the artworks at a score of 3.

The use of acrylic paint, water, and brushes (materials) to develop the idea(s) of favorite things (people, animals, shoes, Houston, and flying) is evident but unclear. Identically listed for each artwork, the process(es) is defined as, "I decided to paint my top 5 favorite things. Animals, shoes, the city, the beach, and the sky." The process of using acrylic paint to further student ideas lacks clarity. It is helpful for students to state how the choice of material is manipulated to communicate their ideas further when considering process statements. Cutting and pasting the same content for each artwork often doesn't provide insight into student decision-making.

Written evidence identifies materials, processes, and ideas. A score of 2 states that written evidence may identify materials, processes, and ideas. Although written evidence is cut and pasted and could be more informative, the specified materials, processes, and ideas meet a score of 3.
